Total No. of Pages : 2

I Semester M.Sc. (Speech Language Pathology)

Examination, February - 2025

(Scheme : CBCS)

SPEECH PRODUCTION

Time : 2 Hours

Max. Marks : 50

Instruction : Answer all questions.

I. 1) Explain the physiology of voice production. [10]

OR

2) Describe the measurements and instrumentation for measuring airflow, air volume and air pressure. [10]

II. 3) Write a short note on : [3 × 5 = 15]

- a) Types of Spectrogram
- b) Applications of Fourier analysis
- c) Cepstral analysis

OR

4) a) Explain the process of Analog to Digital conversion [7]

b) Describe the source filter theory and its limitations [8]

III. 5) Explain the acoustic characteristics of- [3 × 5 = 15]

- a) Vowels
- b) Stops
- c) Fricative

OR

6) Write a short note on [3 × 5 = 15]

- a) Narrow Vs Wide band spectrogram
- b) Isovowel lines
- c) Effect of phonetic contexts on acoustic characteristics

P.T.O.

31952

MM-1968

IV. 7) Explain the Acoustic characteristics of cry in abnormal infants. [10]

OR

8) What is articulatory synthesis? Explain its applications in detail. [10]

31953

MM-1969

Sl. No. 0044

Total No. of Pages : 2

I Semester M.Sc. (Speech Language Pathology)

Examination, February - 2025

(Scheme : CBCS)

CHILD LANGUAGE DISORDERS

Time : 2 Hours

Max. Marks : 50

Instruction : Answer all questions.

- I.** 1) a) Write merits, demerits & applications of linguistic & social theory of language acquisition. [10]
b) Write a note on normal process of second language acquisition. [5]
OR
- 2) a) Write short note on application of connectionist & hierarchical models in child language disorders. [10]
b) Outline the neurolinguistic processes in child language disorders. [5]
- II.** 3) a) Explain the linguistic, behavioral & literacy characteristics in children with hearing impairment and intellectual disabilities. [10]
b) Write a note on acquired aphasia in children. [5]
OR
- 4) a) Write a note on language and literacy characteristics in children with attention Deficit Hyperactivity disorders. [8]
b) Outline the communication problems found with ASD. [7]
- III.** 5) Write short notes on the following [2 × 5 = 10]
a) RAP - K
b) CLAP - C
OR
- 6) Write a note on relevance of neuroimaging methods in the assessment of child language disorders. [10]

P.T.O.

31953

MM-1969

IV. 7) Write a note on Evidence - Based - practice in child language disorders. [10]

OR

8) Write a note on approaches to the management in child languages disorders. [10]

31954

MM-1970

Sl.No. 0043

Total No. of Pages : 1

I Semester M.Sc. Examination, February - 2025

(Scheme : CBCS)

SPEECH-LANGUAGE PATHOLOGY

Neuroscience of Speech and Language

Time : 2 Hours

Max. Marks : 50

Instruction : Answer all questions.

- I.** 1. a) Explain the organisation of spinal cord. [5]
b) Describe neuron structure and types. [10]

OR

2. Explain the origin insertion and function of each cranial nerve. [15]

- II.** 3. Explain the utility of Neuro Imaging methods to understand speech & language mechanisms. [10]

OR

4. Explain Priming and its variants to study linguistic processing. [10]

- III.** 5. Explain the role of neuro-transmitters in detail in mediation of Speech & language. [10]

OR

6. Discuss the signal propagation in nervous system, add a note on ion channels. [10]

- IV.** 7. a) Discuss the effect of aging on speech language domain. [10]
b) Write a note on senescence & senility. [5]

OR

8. Explain any two different theories of aging. [15]

31955

MM-1972

Sl. No. 0053

Total No. of Pages : 2

I Semester I Year M.Sc. Examination, February - 2025

(Scheme : CBCS)

SPEECH LANGUAGE PATHOLOGY

**Clinical Linguistics and Multilingual Issues In
Communication**

Time : 2 Hours

Max. Marks : 50

Instruction : Answer all questions.

- 1) Explain the major principles of General Linguistics and state their clinical relevance. [10]

OR

- 2) Discuss the Phonological errors which may be reflected in speech/language samples of some speech-language disordered groups. [10]

- 3) Explain how the semantic acquisition takes place in children. [15]

OR

- 4) Discuss the grammatical disorders which may be evident in the language samples of Speech and Language disordered population. [15]

- 5) Explain how the Pragmatic development takes place in children. [15]

OR

P.T.O.

31955

MM-1972

6) Write short notes on:

[3 × 5 = 15]

- a) Dialects and their types
- b) Creoles
- c) Diglossia

7) Discuss the multilingual and multicultural issues faced by clinicians in the process of rehabilitation especially in the Indian context. **[10]**

OR

8) Write short notes on :

[2 × 5 = 10]

- a) Major language families of India.
- b) Linguistic Relativity
