Creating a new Moodle quiz is accomplished in two steps. The first step involves creating the quiz activity itself. During this step, you configure the quiz with the options you want for the students who will interact with that quiz. This involves items such as how long the quiz is available and how many questions will be displayed per page. The second step is actually adding the questions to the quiz itself. *This article will **only** discuss setting up the quiz configuration*.

1. Turn Editing On
2. Determine the section of the course where you want to add the quiz link. Then, from the "Add an activity" drop-down menu, select *Quiz.*
3. On the Adding a New Quiz configuration screen, the following options are available:

General section

Name: This section is where you name or title the quiz. The name will become a text link on the course homepage and also on the quiz index screen. This is a required field.

Introduction: This section is for any instructions or information regarding the quiz you want to give to the students. The instructions appear on the quiz introduction screen. They will be able to read any instructions before they
