

# OUTREACH SERVICES

The institute carries out various outreach services on communication and its disorders in different parts of the country through the Department of Prevention of Communication Disorders (POCD) and Tele-Centre for Prevention of Communication Disorders (TCPD). Also, the Institute has 12 Outreach Service Centres (OSCs) and 13 New-born Screening Centres across the country. Of the 12 OSCs, seven were opened during the reporting year. The major outreach services carried out during the reporting year are given below.

## Communication Disorder Screening Programmes

The Institute conducted screening programmes for communication disorders in different settings and localities. The individuals participating in the programmes were checked for speech, language and hearing disabilities and provided with diagnostic and therapeutic services.

## New-born / Infant Screening

This programme focuses on screening neonates and infants who are at risk for communication disorders using various tools such as High-Risk Register for communication disorders, Behavioral Observation Audiometry, Oto Acoustic Emission Screening and Screening Checklists.

During the reporting year, screening programme was carried out at 17 hospitals in Mysuru, 12 Outreach Service Centres (OSC) and their nearby hospitals and 13 Newborn Screening Centres (NBS) of the Institute functioning in different parts of the country. A total of 34051 newborns were screened. Of these, 2340 were at risk for communication disorders. The details are given in table 29.

## Tele-follow up for risk babies

The new-borns/infants referred during the new-born screening were followed up through telephone calls to parents/caregivers and advised for detailed evaluation at the Department of Clinical Services at AIISH, Mysuru or at the NBS centers/OSCs. A complete test battery was administered for those clients who came for follow-up. The details are given in table 30.

Table 30: Tele - follow up

## Industrial Screening

The Institute conducts hearing screening and screening for other communication disorders for the industrial workers and employees who are repeatedly exposed to loud noises at their work settings. Totally, 490

employees were screened, and among them, 162 were referred for detailed evaluation. The employees were also oriented on harmful effects of noise on hearing, importance of hearing conservation program and also use of hearing protective devices in noisy areas. Totally, 76 employees attended for the detailed audiological evaluation at the Institute. Of the 152 ears tested, 17 had normal hearing, 47 minimal hearing loss, 74 mild hearing loss, 13 moderate hearing loss and one moderately severe hearing loss.

## Student Screening

Nursery, primary school, secondary school and PU college students were screened for communication disorders as a part of the school screening programme during the reporting year. Totally, 2642 students were screened and among them 131 (4.9%) were identified with ear-related disorders, 125 (4.7%) with hearing loss and 75 (2.8%) with speech-language disorders. They were recommended for follow-up at the Institute.

## Elderly Screening

Speech, language and hearing evaluations were carried out for elderly citizens. Totally, 64 elderly citizens were screened and among them 24 persons passed the hearing test. The remaining 40 elders had hearing loss (26 nos.), speech-language disorders (14 nos.), cognitive disorders (11 nos.), ENT issues, and swallowing disorders (2 nos.).

## Camp-based Screening

The Institute organized seventy camps for screening the citizens for communication disorders in various localities across Karnataka during the reporting year. The camps were organized under the aegis of the Department of POCD, Outreach Service Centres and the New-born Screening Centres of the Institute. The expert speech, hearing and allied health professionals of the institute screened 5936 individuals for communication disorders in the camps. The details are given in table 32.

## Screening the General Public

The general public were screened for speech, language and hearing disorders at the Department of POCD at AIISH and Outreach Service Centres at Belagavi, Kalaburgi, Nanjangud, Gumballi, Akkihebbalu, Sarguru and Sagara. Totally, 2648 persons were screened and among them, 605 had hearing loss, 95 had speech-language disorders and 14 ENT issues. The affected persons were provided with appropriate rehabilitation services.

## Clinical Services at Outreach Service Centers

Diagnostic and therapeutic services on communication disorders were provided at the Outreach Service Centres of the institute located in different parts of the country. Totally, 2633 persons were registered for availing clinical services at the 12 OSCs. The clients were evaluated for speech-language and hearing disorders and provided with speech-language therapy and hearing aids. The details are given in table 33 and table 34.
