

### **Additional Justification for Godrej Mobile Compactor**

We need a quality storage solution for archiving the costly back volumes of journals. Many of those journals have stopped publication and are not available online. Hence, valuable and rare. The Godrej products are tested successfully for quality as per ISO 9001:2015, 14001:2015, and BIFMA standards. Also, they follow safety norms in accordance to OHSAS 18001:2015. Godrej India is making indigenous/ in-house manufactured products aligned to the "Make in India" Policy. It has Indian Design Mark, a recognition of Quality Design Product of the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry. The price list of the products is also common across India and is listed in GEM thereby maintaining the prices' genuinity. The firm has a local service support facility, and hence, any kind of support or services required in the future can be sought immediately. Moreover, we need customization of the compactor as per the measurement and design enclosed. Godrej has an in-house design team who can help on the same.
