# Library & Information Science Research

## About the Authors

As an associate professor at the School of Information Studies, University of Wisconsin–Milwaukee, **Elizabeth Buchanan** researches and teaches in the areas of information and research ethics. She is also Director of the Center for Information Policy Research at UWM and is currently Chair of the Association of Internet Researchers Ethics Working Group, Co-Director of the International Society of Ethics and Information Technology (INSEIT), and 2008 Chair of the Wisconsin Library Association Intellectual Freedom Round Table. She recently completed, with Kathrine Henderson, *Case Studies in Library and Information Science Ethics* (McFarland Press), and was a recipient, with Charles Ess, of a National Science Foundation Ethics and Values in Science Grant on Internet Research Ethics and a National Center for E-Social Science Visiting Research Fellowship at the University of Oxford. She is also an adjunct associate professor at the Center for the Study of Bioethics, Medical College of Wisconsin, and a frequent consultant and speaker on Internet-related research ethics. She and Charles Ess founded and edit the new International Journal of Internet Research Ethics.

**Matt Elbeck** is professor of marketing at Troy University. He earned his Ph.D. in marketing from the University of Wales in 1982, and has since taught at universities in the United States, United Kingdom, Canada, and Saudi Arabia. Matt's scholarship in the area of services marketing has produced numerous journal and conference publications and conference presentations. He has reviewed numerous marketing textbooks and software, reviews for 5 business journals, and is editor of the *Journal of Educators Online*. In addition to serving for one year as Director of Programs and Strategy for the IT Centre, UK, Matt has consulted for the Management Centre Europe and Orange-KPN in Belgium, the American Psychiatric Association, Forte Hotels, the London Chamber of Commerce, Price Waterhouse and Lloyds Bank PLC in the UK, the Red Cross and United Way in Canada, the National Bank of Pakistan, and Unilever in Saudi Arabia.

**Raya Fidel** is a professor at The Information School of the University of Washington and the director of its Center for Human-Information Interaction (CHII). She teaches courses in human-information interaction, research methods, and in cognitive work analysis. Her research has focused on naturalist studies of HII taking place in several work environments and of a variety of actors, including high school students, engineers, and field workers in public utilities. Her recent publications have appeared in *Information Research*, *Information Processing & Management*, *Journal of the American Society for Information Science & Technology*, *New Review of Information Behaviour Research*, and *Library & Information Science Research*.

**Paul T. Jaeger** is an assistant professor in the College of Information Studies and the director of the Center for Information Policy and Electronic Government at the University of Maryland. His research focuses on the ways in which law and public policy shape access to information. He is the author of more than 50 journal articles and book chapters, along with 4 books. His research has appeared in such journals as *Telecommunications Policy*, *Library Quarterly*, *Government Information Quarterly*, *Journal of the American Society for Information Science & Technology*, *Library & Information Science Research*, *Journal of Disability Policy Studies*, and *Information Technology and Libraries*.

**Boryung Ju** is an assistant professor at the School of Library & Information Science, Louisiana State University. She received her Ph.D. from the School of Information Studies at Florida State University. She teaches human computer interaction, networks for information centers, Website design and management, and research methods. Her research areas include interface design and evaluation, human factors, user modeling, and usability analysis. Her recent publications have appeared in *Journal of the American Society for Information Science & Technology* and *Library & Information Science Research*.

**Seonghee Kim** is associate professor at Chung-Ang University, Department of Library & Information Science, where she teaches courses in multimedia information retrieval, database management, knowledge management, and Web programming. She is an Advisory Committee member for the Korean National Library and a member of the Korean Technical Committee. Her research interests include image and video retrieval, semantic Web, and knowledge management.

**Lili Luo** is a lecturer at the School of Library and Information Science at San Jose State University. She received her Ph.D. from the University of North Carolina, Chapel Hill in 2007. Her primary area of research interest is digital reference and she has been publishing actively in this area in *Library & Information Science Research* and *Reference Services Review*. Her other research interests include library education, information seeking behavior, and human-information interaction.

**B. Jean Mandernach** is associate professor of psychology and research associate for the Center for Excellence in Teaching and Learning at Park University. She received her Ph.D. in social psychology from University of Nebraska at Lincoln and has spent the majority of her career studying

the scholarship of teaching and learning. Her current research examines instructional strategies that enhance learning and student engagement in the online classroom as well as assessment and evaluation of online teaching.

She has published articles in the *Journal of Educators Online*, *Journal of Online Learning and Teaching*, *Journal of Educational Technology*, *Journal on Educational School Educational Technology*, *Journal of Interactive Online Learning*, and the *Online Journal of Distance Learning Administration*, among others, and has published ancillary materials and online resources for a number of psychology textbooks.

**Charles R. McClure** is the Francis Eppes Professor of Information Studies and director of the Information Use Management Policy Institute at the School of Information Studies, Florida State University. He completed his Ph.D. from Rutgers University and prior to his position at Florida State University had been a distinguished professor at the School of Information Studies, Syracuse University. He was one of the two founding editors of *Government Information Quarterly* and currently serves as the journal's associate editor. With John Carlo Bertot, he has conducted the national survey of public libraries and the Internet since 1994, currently funded by the Bill & Melinda Gates Foundation and the American Library Association. He has written extensively on topics related to the planning and evaluation of information services, federal information policy, information resources management, and digital libraries.

**Gary Marchionini** is Cary C. Boshamer Professor in the School of Information and Library Science (SILS) at the University of North Carolina at Chapel Hill where he teaches courses in human-information interaction, interface design and testing, and digital libraries, and also heads the Interaction Design Laboratory. His Ph.D. from Wayne State University is in mathematics education with an emphasis on educational computing. He was previously professor in the College of Library and Information Services at the University of Maryland and a member of the Human-Computer Interaction Laboratory. His award-winning publications have appeared in such journals as *Communications of the ACM*, *Information Processing & Management*, *Journal of the American Society for Information Science & Technology*, *Journal of Digital Information*, and *Library & Information Science Research*.

**Lokman I. Meho** is assistant professor at the School of Library and Information Science, Indiana University Bloomington. He received his doctorate from the School of Information and Library Science, University of North Carolina at Chapel Hill, in 2001. His papers have appeared in the *Journal of the American Society for Information Science & Technology*, *Library & Information Science Research*, *Physics World*, and *Journal of Academic Librarianship*. His research focuses on citation analysis, information seeking behavior, and scholarly communication. He teaches reference, online searching, evaluation of library sources and services, and social science information.

**Terrell G. Russell** is a doctoral student in the School of Information and Library Science at the University of North Carolina at Chapel Hill. He has B.S. degrees in computer engineering and information technology and service organizations., and an M.S. in computer networking, all three are from North Carolina State University. His research interests revolve around identity, social tagging and folksonomy, and cognitive authority and expertise.

**Pnina Shachaf** is an assistant professor at the School of Library and Information Science, Indiana University, Bloomington. She holds a Ph.D. from the University of North Carolina at Chapel Hill. Her research areas focus on e-services, digital reference, evaluation of reference services, collaboration and electronic information sources, and her recent publications appear in *Information and Management*, *Journal of Academic Librarianship*, *Journal of Information Science*, *Journal of the American Society for Information Science & Technology*, and *Library & Information Science Research*.

**Debora Shaw** is a professor at the Indiana University School of Library and Information Science. She holds a Ph.D. from the same institution. Her research interests include information seeking and use by humanities scholars and the design and impact of electronic information sources. Her publications have appeared in journals such as *First Monday*, *Journal of Documentation*, *Journal of the American Society for Information Science & Technology*, *Library & Information Science Research*, and *Scientometrics*.

**Cassidy R. Sugimoto** is a doctoral student in the School of Information and Library Science at the University of North Carolina at Chapel Hill, from which she also received her master's degree in library science. Her current research interests include bibliometrics and scholarly communication, reference services, and library and information science history and education.

**JungWon Yoon** is an assistant professor at the School of Library and Information Science, University of South Florida. She received her Ph. D. in information science from the University of North Texas in 2006. Her research interests include image representation and retrieval, information visualization and browsing, information organization, metadata, and semantic interoperability. She has presented her research at conferences of the American Society for Information Science & Technology and the Association for Library and Information Science Education.
