Library & Information Science Research

About the Authors

Stephen Asunka is a post-doctoral research fellow at the EdLab, an educational technology research, design and development unit at Teachers College, Columbia University. He holds an MSc in chemistry from the University of Ghana, and an EdD in instructional technology and media from Teachers College. His current educational activities focus on the research and development of innovative technology supported knowledge and skills-based training tools and resources. He also seeks to understand learner attitudes towards these resources so as to help ensure their effective and optimal use. His recent publications and conference presentations have largely dwelt on higher education students' information seeking habits, their perceptions towards collaborative online learning, and online pedagogical approaches instructors can adopt to ensure positive cognitive and affective learning outcomes.

Andrew J. Campbell is a senior lecturer in the Faculty of Health Sciences at the University of Sydney in Sydney, Australia. He is also a practicing psychologist in the Australian state of New South Wales, specializing in child and adolescent psychology. He holds a PhD from the University of Sydney, and teaches psychology courses such as human development and cyberpsychology in the context of health sciences. His research focuses on lifespan mental health problems and how they can be improved using evidence based practice meshed with information technology. He is the director and team leader of the Prometheus Research Team at the University of Sydney.

Hui Soo Chae is the director of development and research at the Edlab, Teachers College, Columbia University, and Associate Director of the Gottesman Libraries at Columbia. In that role, he manages external partnerships and outreach activities and supervises the units responsible for consulting, research and innovative approaches to learning. Most recently, he coordinated the development of online resources for the Teaching the Levees Project. A former social studies teacher, he holds an AB degree in public policy and an MAT from Brown University. As a Spencer Fellow and John Dewey Scholar he has worked extensively with youth of color in and out of school settings. His current research focuses on the identities constructed by Korean-American, working-class/poor youth in their various social worlds.

Hazel Hall is the director of the Centre for Social Informatics in the School of Computing at Edinburgh Napier University, Scotland. She is currently seconded part-time to lead the implementation of the plans of the UK Library and Information Science Research Coalition. Her main research expertise and teaching interests lie in information sharing in online environments within the context of knowledge management. Other themes in which she maintains an active interest, and has published widely, include social computing, online communities and collaboration, the education and training of information professionals, and online information services provision.

Catherine Haras has been the information literacy coordinator at California State University, Los Angeles (CSULA), since 2005. Tenured at the associate level, she is responsible for library curriculum and

instructional outreach. She has published on at-risk and first generation Latinos' use of the library and information literacy development. She has taught or developed information and research courses for the Colleges of Engineering, Technology & Computer Science and the master's program for applied biotechnology in CSULA's Department of Biological Sciences. She also helped to develop the CSULA freshman experience equivalent, which now has an information literacy requirement due to her work. She is the 2009 recipient of CSULA's distinguished women award, has been honored by the 23-campus CSU at the system-wide level for her work with information literacy, and is currently working in her seventh grant: training and using undergraduate peer mentors to conduct on-site reference outside the university library.

Heidi Julien is a professor in the School of Library and Information Studies, University of Alberta, Canada. She has a bachelor's degree in education and master's in library and information studies from the University of Alberta, and a PhD from the University of Western Ontario, Canada. Previously, she held academic appointments at Dalhousie University in Halifax, Canada, and at Victoria University of Wellington, New Zealand. She is editor of the *Canadian Journal for Information and Library Science*. Her research interests include human information behavior, information literacy, and information policy; this work is funded primarily by the Social Sciences and Humanities Research Council of Canada.

Ye Liu is a student in the Faculty of Social Science at the University of Western Ontario, and is pursuing a double major in social psychology and human resources. She is an undergraduate member of Prometheus-IS (Information Science) at the University of Western Ontario.

Ray Lyons is an independent consultant in statistical programming, library evaluation, and software implementation. He is the co-designer of the *Library Journal Index of Public Library Service*. His articles have appeared in *Public Library Quarterly*, *Public Libraries*, *Evidence Based Library and Information Practice*, and *Library Statistics for the 21st Century World* (IFLA Publication 138).

Gary Natriello is the Ruth L. Gottesman Professor in Educational Research and a professor of sociology and education in the Department of Human Development at Teachers College, Columbia University. He is a Senior Research Scientist at the Institute of Urban and Minority Education at Teachers College and a Faculty Fellow of the Institute for Social and Economic Research and Policy at Columbia. He directs the Gottesman Libraries and is the executive editor of the *Teachers College Record*. His prior affiliations have included the Center for the Social Organization of Schools and the National Center for Research on Effective Schooling for Disadvantaged Youth, both at Johns Hopkins University. He holds an AB in English from Princeton University, an AM in sociology from Stanford University, and a PhD in sociology of education from Stanford University, and is the author of several books, including *Schooling Disadvantaged Children: Racing Against Catastrophe*, and *From Cashbox to Classroom*.

Diane M. Neal is an assistant professor in the Faculty of Information and Media Studies at the University of Western Ontario, Canada. A former systems librarian, she earned her PhD in information science from the University of North Texas. She teaches courses in information organization, database systems, research methods, and Web usability. Her research interests include online consumer health information issues, emotion-based user tagging of images and music, and systems design. She is the director of the Information Science branch of the Prometheus Research Team (Prometheus-IS).

Doris Nussbaumer is a master's student in the library and information science program in the Faculty of Information and Media Studies at the University of Western Ontario, Canada. She has an academic and research background in psychology.

Jen (J.L.) Pecoskie holds a PhD and a master's degree in library and information science from the Faculty of Information and Media Studies at The University of Western Ontario. Her research interests include the sociology of the pleasure reader, information literacy, and human information behavior.

Mary Piorun is the associate director for Community, Technology and Global Relations at the University of Massachusetts Medical School's Lamar Soutter Library. She serves as a member of the senior management team and is currently leading the library's effort to become a vital partner in education, clinical care, and research. Before joining the medical school she received her MSLS from Catholic University in 1995, and was awarded her MBA from Bentley University in February 2008; she is currently pursuing a PhD in managerial leadership for the information professions at Simmons College. In 2008 she received the W. Michael Hoffman Prize for Business Ethics from the Bentley University, Center for Business Ethics. Her recent publications are in the area of institutional repositories, inter-library loan processes and using teams to manage library remodeling projects.

Kathleen Reed has master's degrees in humanities computing and library and information studies from the University of Alberta. Her research interests include information behavior, feminist international development, and cross-cultural information interactions.

Reijo Savolainen received his PhD from the University of Tampere, Finland, in 1989, and has taught in the Department of information Studies at that university since that time. His research interests include information needs, seeking and use. From the early 1990s, his major area of research has been everyday life information seeking (ELIS). Studies conducted in this field have focused on ELIS practices of various groups such as teachers, industrial workers, people interested in self-development, consumers, environmental activists, and the unemployed people. Currently, he is elaborating on the conceptual

and empirical questions of everyday life information practices. His publications include about 100 articles and books published in national and international forums, and in journals such as *Information Processing & Management*; *Journal of the American Society for Information Science and Technology*; *Journal of Documentation*; *Library and Information Science Research*, and *Library Quarterly*. His newest book is *Everyday Information Practices. A Social Phenomenological Practice* (Scarecrow Press, 2008). He is a member of the editorial board of *Information Research* and *Library & Information Science Research*, and has served on the program committee and as a reviewer for the biannual *Information Seeking in Context* (ISIC) conferences.

Sei-Ching Joanna Sin is a visiting assistant professor at the School of Library and Information Studies at the University of Wisconsin-Madison. She holds a PhD and a master's degree in library and information science from the University of Wisconsin-Madison and a bachelor of social science degree from the Chinese University of Hong Kong. Her research interests include structural and individual factors in information behavior, public library use and non-use, information equity, and information behavior of diverse populations.

Cassidy R. Sugimoto is an assistant professor in the School of Library and Information Science at Indiana University, Bloomington. She holds master's and doctoral degrees in library and information science from the University of North Carolina at Chapel Hill. Her interests are in bibliometrics and scholarly communication, with an emphasis on the production of new scientists and the emergence and growth of scientific disciplines. Her work has been published in the *Journal of Education for Library & Information Science*, *Journal of the American Society for Information Science & Technology*, *Journal of Information Science*, and *Library & Information Science Research*.

Andreas Vårheim is an associate professor in the Department of Culture and Literature at the University of Tromsø, Norway, and at the Faculty of Journalism, Library and Information Science, Oslo University College, Norway. His primary research interests are in institutional development and information policy focusing on public libraries and social trust. He has published many papers in peer-reviewed journals, and has co-edited a book on documentation studies.

Lynne Y. Williams is an adjunct professor in the School of Information Systems and Technology at Kaplan University. She teaches courses in computer networking and security. Her research interests include user-focused delivery of online information as well as ethical and privacy issues related to the Internet. She is an affiliate member of the Prometheus Research Team.
