A FORUM FOR SIX CONTINENTS

WORLD NEUROSURGERY'S PEER REVIEW PROCESS

All articles appearing with peer review designation have undergone a strict independent peer review process comprised of a minimum of six reviewers and the Editor-in-Chief.

Reviewing panels are comprised of individuals who have earned positions of authority in the area related to the manuscript. In their composition, consideration is given to geographic location and widespread diversity of opinion. Every possible effort is made to exclude personal bias in decision making.
