Literature listing and book reviews

1. Books

No entries.

2. Journals

The listing in this issue includes entries found using SciVerse Scopus™, Elsevier's abstract and indexing database which gives access to almost 18000 peer-reviewed titles from more than 5000 international publishers.

2.1. Search techniques, databases and analysis: classification: searcher certification

2.1.1. Search techniques, databases

A user-centered evaluation of a web based patent classification tool. Giachanou A., Salampasis M., Satratzemi M., Samaras N., 2014, CEUR Workshop Proceedings, 1131, 6–11.

An evaluation of an interactive federated patent search system. Salampasis M., Giachanou A., Hanbury A., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8849, 120–131.

An Introduction to the patstat database with example queries. de Rassenfosse G., Dernis H., Boedt G., 2014, Australian Economic Review, 47 (3), 395–408.

Concept suggestion based patent query method. Wu H.-T., Zhu H.-Z., Ma J.-H., Tan R.-H., 2014, Jisuanji Jicheng Zhizao Xitong/Computer Integrated Manufacturing Systems, CIMS, 20 (1), 79–88.

Diversifying query suggestions based on query documents. Kim Y., Croft W.B., 2014, SIGIR 2014 - Proceedings of the 37th International ACM SIGIR Conference on Research and Development in Information Retrieval, http://dx.doi.org/10.1145/2600428.2609467, 891–894.

Finding novel patents based on patent association. Feng L., Peng Z., Liu B., Che D., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8485 LNCS, 5–17.

Forecasting emerging technologies of low emission vehicle. Ranaei S., Karvonen M., Suominen A., Kassi T., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921206, 2924–2937.

Google patents: The global patent search engine. Noruzi A., Abdekhodaz M., 2014, Webology, 11 (1), a122.

Japanese government project on innovation database platform - As an infrastructure for improving quality of science, technology and innovation policy. Tomizawa H., Onodera N., Nakayama Y., Nakamura K., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921077, 1082–1090.

Learning to translate queries for CLIR. Sokolov A., Hieber F., Riezler S., 2014, SIGIR 2014 - Proceedings of the 37th International ACM SIGIR Conference on Research and Development in Information Retrieval, http://dx.doi.org/10.1145/2600428.2609539, 1179–1182.

Learning translational and knowledge-based similarities from relevance rankings for cross-language retrieval. Schamoni S., Hieber F., Sokolov A., Riezler S., 2014, 52nd Annual Meeting of the Association for Computational Linguistics, ACL 2014 - Proceedings of the Conference, 2, 488–494.

Modeling the interactive patent retrieval process: An adaptation of Marchionini's information seeking model. Jurgens J.J., Womser-Hacker C., Mandl T., 2014, Proceedings of the 5th Information Interaction in Context Symposium, IIiX 2014, http://dx.doi.org/10.1145/2637002.2637034, 247–250.

On the usability of random indexing in patent retrieval. Lupu M., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8577 LNAI, 202–216.

Particular experience in design and implementation of a Current Research Information System in Russia: National specificity. Zelepukhina V.A., Danilova T.S., Burmistrov A.S., Tarasevich Yu.Yu., 2014, Procedia Computer Science, 33, 168–173.

Patent query formulation by synthesizing multiple sources of relevance evidence. Mahdabi P., Crestani F., 2014, ACM Transactions on Information Systems, 32 (4).

Utilizing sub-topic units for patent prior-art search. Dong Z., Jianxun L.I.U., Sanrong Z., 2014, Chinese Journal of Electronics, 23 (3), 480–483.

Estimating retrievability ranks of documents using document features. Bashir S., 2014, Neurocomputing, 123, 216–232.

The double-edged sword of recombination in breakthrough innovation. Kaplan S., Vakili K., 2014, Strategic Management Journal, http://dx.doi.org/10.1002/smj.2294.

A keyword selection method for mapping technological knowledge in specific sectors through patent data: the case of biofuels sector. Costantini V., Crespi F., Curci Y., 2014, Economics of Innovation and New Technology, http://dx.doi.org/10.1080/10438599.2014.942583.

2.1.2. Analysis and statistics

2013 nanotechnology patent literature review: Graphitic carbon-based nanotechnology and energy applications are on the rise.

http://dx.doi.org/10.1016/j.wpi.2015.02.004
0172-2190

Jordan C.C., Kaiser I., Moore V.C., 2014, Nanotechnology Law and Business, 11 (2), 111–125.

A bibliometrics application for evaluating contribution of a research institute to science. Nakamura H., Kajikawa Y., Suzuki S., 2014, 29th Congress of the International Council of the Aeronautical Sciences, ICAS 2014.

A case study for the Fubon group-the group's topology and patent activity in the digital convergence era. Lee P.-C., 2014, NTUT Journal of Intellectual Property Law and Management, 3 (1), 72–87.

A comparative study of key phrase extraction for cross-domain document collections. Tantanasiriwong S., Haruechaiyasak C., Guha S., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8839, 393–398.

A comparative study of patent counts by the inventor country and the assignee country. Sung H.-Y., Wang C.-C., Chen D.-Z., Huang M.-H., 2014, Scientometrics, 100 (2), 577–593.

A function oriented method for competitive technological intelligence and technology forecasting. Russo D., Rizzi C., 2014, 2014 International Conference on Engineering, Technology and Innovation: Engineering Responsible Innovation in Products and Services, ICE 2014, http://dx.doi.org/10.1109/ICE.2014.6871580.

A model for measuring the r&d projects similarity using patent information. Kim J.-B., Byun J.-W., 2014, ICISA 2014–2014 5th International Conference on Information Science and Applications, http://dx.doi.org/10.1109/ICISA.2014.6847333.

A patent analysis method to trace technology evolutionary pathways. Zhou X., Zhang Y., Porter A.L., Guo Y., Zhu D., 2014, Scientometrics, 100 (3), 705–721.

A preliminary study on the difference between the citation counts of issued patents and their corresponding pre-grant publications. Kuan C.-H., Cheng H.-J., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921190, 2813–2818.

A spatial econometric panel data examination of endogenous versus exogenous interaction in Chinese province-level patenting. LeSage J.P., Sheng Y., 2014, Journal of Geographical Systems, 16 (3), 233–262.

A technology opportunities analysis model: applied to dye-sensitised solar cells for China. Ma T., Porter A.L., Guo Y., Ready J., Xu C., Gao L., 2014, Technology Analysis and Strategic Management, 26 (1), 87–104.

Agricultural patent analysis during 2005–2012 in India. Mehta H., Ayoub Dar M., Kumar R., Chaturvedi O.P., 2014, International Journal of Intellectual Property Management, 7 (41671), 15–32.

An across data sources environmental scanning mechanism for issue analysis. Chan T.-Y., Lin H.-C., Tsai W.-H., Hsu Y.-P., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921032, 1841–1854.

An analysis of exploration and exploitation of technological knowledge for software and service. Ioku A., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921058, 3004–3019.

An efficient patent storing mechanism based on sqlite on hadoop platform. Rui X., Kim B., Min D., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8597, 382–392.

An empirical research on R&D expenditure and invention patents of Zhejiang innovative enterprises. Duan S., 2014, WIT Transactions on Information and Communication Technologies, 61, 1221–1228.

An exploration study of construction innovation principles: Comparative analysis of construction scaffold and template patents. Ding Z., Ma J., 2014, Proceedings of the 17th International Symposium on Advancement of Construction Management and Real Estate, http://dx.doi.org/10.1007/978-3-642-35548-6_86, 843–850.

An exploratory study on the development path of converging technologies using patent analysis: The case of nano biosensors. You Y.-B., Kim B.-K., Jeong E.-S., 2014, Asian Journal of Technology Innovation, 22 (1), 100–113.

Analysis of Chinese patent applications on tipping paper. Zou X., Zhou J.-F., Wang J., Wang F., 2014, Chung-kuo Tsao Chih/China Pulp and Paper, 33 (5), 67–71.

Analysis of global data education and patent activity using new methods of pattern analysis. Myachin A., 2014, Procedia Computer Science, 31, 468–473.

Analysis of patent portfolio and knowledge flow of the global semiconductor industry. Chiu C.-C., Su H.-N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921147, 3621–3634.

Analysis of R&D capacity and cooperation trend of China and US in the field of clean coal technology based on paper and patent data. Tao R., Wu S.H., Yan D., 2014, Advanced Materials Research, 955–959, 3933–3940.

Analysis of R&D capacity and cooperation trend of China and US in the field of building energy efficiency - Based on paper and patent data. Zheng Y.S., Liu Y.J., Tao R., 2014, Applied Mechanics and Materials, 587–589, 269–275.

Analysis on convergence in green technology field using patent information. Jeong D.H., Kwon Y.I., 2014, Applied Mechanics and Materials, 548–549, 1981–1993.

Analyzing patent characteristics and business strategies of non-practicing entities. Jiang S.-Y., Su H.-N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921156, 1322–1335.

Analyzing technological knowledge diffusion among technological fields using patent data: The example of microfluidics. Qiao Z., Huang L.-C., Wu F.-F., Wu D., Zhang H., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921188, 3103–3111.

Are public research spin-offs more innovative? Stephan A., 2014, Small Business Economics, 43 (2), 353–368.

Are significant inventions more diversified? Luan C., Hou H., Wang Y., Wang X., 2014, Scientometrics, 100 (2), 459–470.

Assessing innovation capability and scientific impact of industry through patented technologies. Kang C.-W., Su H.-N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921146, 1281–1290.

Assessing innovations in cloud security. Khansa L., Zobel C.W., 2014, Journal of Computer Information Systems, 54 (3), 45–56.

Assessing the relative importance of multiple channels for embodied and disembodied technological spillovers. Krammer

S.M.S., 2014, Technological Forecasting and Social Change, 81 (1), 272–286.

Automatically explore inter-discipline technology from Chinese patent documents. Cheng M.S., Hsu P., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8440 LNCS, 65–77.

China's agricultural patents: How has their value changed amid recent patent boom? Liu L.-J., Cao C., Song M., 2014, Technological Forecasting and Social Change, 88, 106–121.

China's patterns of international technological collaboration 1976–2010: a patent analysis study. Wang X., Ren J., Zhang Y., Zhu D., Qiu P., Huang M., 2014, Technology Analysis and Strategic Management, 26 (5), 531–546.

Combining ICT-standards essential-patents and medical-managerial guidelines towards sustainable assisted-living and home-care. Spyropoulos B., 2014, Proceedings of the 2014 ITU Kaleidoscope Academic Conference: Living in a Converged World - Impossible Without Standards?, K 2014, http://dx.doi.org/10.1109/Kaleidoscope.2014.6858488, 121–128.

Commercial application scenario using patent analysis: Fermentative hydrogen production from biomass. Hsu C.-W., Chang P.-L., Hsiung C.-M., Lin C.-Y., 2014, International Journal of Hydrogen Energy, 39 (33), 19277–19284.

Comparative study of technological trend between DAIKIN and Panasonic in the field of air conditioner. Pham N., Tanaka Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921176, 1416–1424.

Comparisons of technological innovation capabilities in the solar photovoltaic industries of Taiwan, China, and Korea. Wu C.-Y., 2014, Scientometrics, 98 (1), 429–446.

Competition in core-periphery technology?: Investigation of overseas companies on their integration of Mainstream technologies and surrounding technologies in China. Chen X., Huang M., Hu Y., He X., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921308, 2848–2856.

Competition & innovation: Evidence from U.S. patent and productivity data. Correa J.A., Ornaghi C., 2014, Journal of Industrial Economics, 62 (2), 258–285.

Core technological competence and knowledge accumulation in the functional food industry: An empirical study of Japanese food firms. Lalitnorasate P., Miyazaki K., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921237, 1072–1081.

Correlation analysis between financial data and patent score based on HITS algorithm. Nonaka H., Kubo D., Makoto, Kimura T.H., Ota T., Masuyama S., 2014, 2014 IEEE International Technology Management Conference, ITMC 2014, http://dx.doi.org/10.1109/ITMC.2014.6918607.

Crafting IP strategies to tailor-fit the industry evolution. Fong H.Y.A., Lan Y., Liu S.-J., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921264, 1291–1300.

Detecting technological originality through cross-domain knowledge in company. Wang C.-C., Huang M.-H., Dong H.-R., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921253, 2807–2812.

Detection and introduction of emerging technologies for green buildings in Thailand. Visessonchok T., Sasaki H., Sakata I., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921171, 620–631.

Determinants of foreign technological activity in German regions - A count model analysis of transnational patents. Dettmann E., Lacasa I.D., Gunther J., Jindra B., 2014, Foresight Russia, 8 (1), 34–51.

Develop an integrated patent quality matrix for investigating the competitive features among multiple competitive patent pools.

Wang Y.-H., Trappey A.J.C., Liu B.P., Hsu T.-C., 2014, Proceedings of the 2014 IEEE 18th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2014, http://dx.doi.org/10.1109/CSCWD.2014.6846872, 370–373.

Development of a practical tool for exploring the map of technology. Kim S.Y., Lee J.Y., Yoon H., Lee H.J., 2014, DATA 2014 - Proceedings of 3rd International Conference on Data Management Technologies and Applications, 85–90.

Diversity of fields in patent citations: Synchronic and diachronic changes. Yoshikane F., Suzuki T., 2014, Scientometrics, 98 (3), 1879–1897.

Does Foreign Environmental Policy Influence Domestic Innovation? Evidence from the Wind Industry. Dechezlepretre A., Glachant M., 2014, Environmental and Resource Economics, 58 (3), 391–413.

Effective document-level features for Chinese patent word segmentation. Li S., Xue N., 2014, 52nd Annual Meeting of the Association for Computational Linguistics, ACL 2014 - Proceedings of the Conference, 2, 199–205.

Effects of knowledge capital on total factor productivity in China: A spatial econometric perspective. Scherngell T., Borowiecki M., Hu Y., 2014, China Economic Review, 29, 82–94.

Electrifying the automotive industry: The geography and governance of R&D collaboration. Sarasini S., 2014, Environmental Innovation and Societal Transitions, 13, 109–128.

Empirical study of constructing a knowledge organization system of patent documents using topic modeling. Hu Z., Fang S., Liang T., 2014, Scientometrics, 100 (3), 787–799.

Evaluation method for nature of basic invention by patent analysis. Miyazawa T., Osada H., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921249, 1346–1353.

Exploring technology evolution using patent classification: A case of cochlear implant technology patents. Arunagiri S., Mathew M., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921278, 1459–1470.

Finding the 'boundary mediators': Network analysis of the joint R&D project between Toyota and Panasonic. Tsujimoto M., Matsumoto Y., Sakakibara K., 2014, International Journal of Technology Management, 66 (2–3), 120–133.

Follow or find another way?: 'De-opponent' trend of patent acquisition between apple and Samsung smartphones. Yang M.-C., Chang Y.-H., Chang P.-C., Ho K.-L., 2014, PICMET 2014 - Portland

International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921256, 1091–1097.

Forecasting dental implant technologies using patent analysis. Chang S.W.C., Trappey C.V., Trappey A.J.C., Wu S.C.-Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921140, 1483–1491.

From observation, detection to design of innovative research and technology. Kajikawa Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921042, 2589–2596.

Generation and diffusion of innovations in a district innovation system: The case of ink-jet printing. Reig-Otero Y., Edwards-Schachter M., Feliu-Mingarro C., Fernandez-de-Lucio I., 2014, Journal of Technology Management and Innovation, 9 (2), 56–76.

How competitive forces sustain electric vehicle development. Wesseling J.H., Faber J., Hekkert M.P., 2014, Technological Forecasting and Social Change, 81 (1), 154–164.

How do prolific inventors impact firm innovation in ICT: implications from patent co-inventing network. Zhang G., Lv X., Duan H., 2014, Technology Analysis and Strategic Management, 26 (9), 1091–1110.

How to forecast cross-border patent infringement? - The case of U.S. international trade. Lee P.-C., Su H.-N., 2014, Technological Forecasting and Social Change, 86, 125–131.

Influences of counting methods on country rankings: A perspective from patent analysis. Zheng J., Zhao Z., Zhang X., Huang M.-H., Chen D.-Z., 2014, Scientometrics, 98 (3), 2087–2102.

Information society as an environment for creating new knowledge. Urintsov A.I., Dik V.V., Kameneva N.A., Makarenkova Y.V., 2014, Naukovyi Visnyk Natsionalnoho Hirnychoho Universytetu, (4), 113–120.

Innovating standards through informal consortia: The case of wireless telecommunications. Delcamp H., Leiponen A., 2014, International Journal of Industrial Organization, 36, 36–47.

Innovation and patent knowledge management in the construction industry. Ding Z., Wang J., Ng F., 2014, Proceedings of the 17th International Symposium on Advancement of Construction Management and Real Estate, http://dx.doi.org/10.1007/978-3-642-35548-6_85, 833–842.

Innovation of telehomecare service industry: A patent-based assessment. Wang M.-Y., Lin J.-H., Chiang M.-C., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921220, 3481–3491.

Integrating data mining into technology roadmapping. Daim T.U., Van Blommestein K., Islam N., Ozcan S., Hillegas J., Estep J., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921076, 2972–2985.

Inter-cluster connectivity analysis for technology opportunity discovery. Kim B., Gazzola G., Lee J.-M., Kim D., Kim K., Jeong M.K., 2014, Scientometrics, 98 (3), 1811–1825.

Interindustry Knowledge Transfer and Absorption via Two Channels: The Case of Korea. Hwang W.-S., Lee J.-D., 2014, Global Economic Review, 43 (2), 131–152.

Internationalisation of innovative activity in Finnish multinational enterprises.

Yamin M., Sinkovics R.R., Richardson C., 2014, European Journal of International Management, 8 (3), 310–330.

Inventive productivity in Japanese materials sector.

Oyamada H., Watanabe T., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921223, 2616–2625.

IPC selection using collection selection algorithms. Giachanou A., Salampasis M., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8849, 41–52.

Linkage between science and technology - A case study of global leading smartphone companies. Chi K.-L., Tsai M.-K., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921072, 995–1008.

Longitudinal patent analysis for international nanotechnology development: Comparison of innovative performance for the ten leading countries using patent data derived from NBER. Liao W.-C., Tseng C.-C., 2014, International Journal of Management and Enterprise Development, 13 (2), 188–216.

Mapping technological trajectories as patent citation networks: Taking the aero-engine industry as an example. Xu Y., Hua X., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921330, 2827–2835.

Mapping the landscape of climate engineering. Oldham P., Szerszynski B., Stilgoe J., Brown C., Eacott B., Yuille A., 2014, Philosophical Transactions of the Royal Society A: Mathematical, Physical and Engineering Sciences, 372 (2031), 20140065.

Medical image-Ultrasonic image patent map. Cheng S.-S., Liu P.I., 2014, Proceedings of the 2014 IEEE 18th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2014, http://dx.doi.org/10.1109/CSCWD.2014.6846836, 169–174.

Modeling technological value net through network contagion: The case of LED industry. Shih H.-Y., Hao Y.-S., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921128, 3234–3245.

Nanocatalysis: Academic discipline and industrial realities. Olveira S., Forster S.P., Seeger S., 2014, Journal of Nanotechnology, 2014, 324089.

Need to establish a methodological philosophy of Competitive Intelligence in SMEs and research groups based on patent analysis [Necesidad de implantar una filosofía metodológica de Inteligencia Competitiva en PYMES y grupos de investigación basada en el análisis de patentes]. Galindo-Melero J., Sanz-Angulo P., De-Benito-Martin J.J., 2014, Iberian Conference on Information Systems and Technologies, CISTI, http://dx.doi.org/10.1109/CISTI.2014.6876982.

Observing regional divergence of Chinese nanotechnology centers. Motoyama Y., Cao C., Appelbaum R., 2014, Technological Forecasting and Social Change, 81 (1), 11–21.

Organizational restructuring and locational hysteresis in R&D: Case study of spatial division of labor in Japanese synthetic chemical companies established by Zaibatsu. Kamakura N., 2014, Geographical Review of Japan, 87 (4), 291–313.

Overcoming localization of knowledge - The role of professional service firms. Wagner S., Hoisl K., Thoma G., 2014, Strategic Management Journal, 35 (11), 1671–1688.

Patent activity in biotechnology. Streltsova E., 2014, Foresight Russia, 8 (1), 52–65.

Patent analysis and measurement for major technology in monitoring system of environmental nuclear radiation. Gu A.-M., Wang H.-J., Zhang J.-G., 2014, Hedianzixue Yu Tance Jishu/Nuclear Electronics and Detection Technology, 34 (1), 24–26.

Patent citation analysis: Calculating science linkage based on citing motivation. Li R., Chambers T., Ding Y., Zhang G., Meng L., 2014, Journal of the Association for Information Science and Technology, 65 (5), 1007–1017.

Patent citations and knowledge spillovers: An analysis of Chinese patents registered in the USA. Yu F., Wu Y., 2014, Asian Journal of Technology Innovation, 22 (1), 86–99.

Patent key component extraction with the application of patent similarity analysis. Hu P., Huang M., Zhu X., 2014, Journal of Computational Information Systems, 10 (13), 5813–5820.

Patent map for emerging technologies: A case of solar cells technology. Li X., Zhou Y., Xue L., Huang L., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921079, 3558–3571.

Patent map of X-ray medical image US and worldwide patent analysis. Cheng S.-S., Chang Y.-H., Wu C.-M., 2014, Proceedings of the 2014 IEEE 18th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2014, http://dx.doi.org/10.1109/CSCWD.2014.6846838, 181–185.

Patenting of China medical imaging market. Cheng S.-S., Hsueh S.-Y., 2014, Proceedings of the 2014 IEEE 18th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2014, http://dx.doi.org/10.1109/CSCWD.2014.6846835, 164–168.

PatentLine: Analyzing technology evolution on multi-view patent graphs. Zhang L., Li L., Li T., Zhang Q., 2014, SIGIR 2014 - Proceedings of the 37th International ACM SIGIR Conference on Research and Development in Information Retrieval, http://dx.doi.org/http://dx.doi.org/10.1145/2600428.2609518, 1095–1098.

Research on Construction Technology Innovation Platform Based on TRIZ. Ding Z., Jiang S., Wu J., 2014, Advances in Intelligent Systems and Computing, 278, 211–223.

Research on the evaluation of nation nanotechnology innovation international level based on patent analysis. Cheng Y., Liu Y., Fan W., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921354, 1373–1382.

Sequencing the evolution of technologies in a system-oriented way: The concept of technology-DNA. Roepke S., Moehrle M.G., 2014, Journal of Engineering and Technology Management - JET-M, 32, 110–128.

Statistical analysis of patent data relating to the organic Rankine cycle. Fu B.-R., Hsu S.-W., Liu C.-H., Liu Y.-C., 2014, Renewable and Sustainable Energy Reviews, 39, 986–994.

Structure of small world innovation network and learning performance. Song S., Chen X., Zhang G., 2014, Mathematical Problems in Engineering, 2014, 860216.

Study and implementation on computer aided innovation system based on TRIZ. Gao C.Q., Zhao F., Yang B., Guo W., 2014, Advanced Materials Research, 1006–1007, 1061–1065.

Substitutability and complementarity of technological knowledge and the inventive performance of semiconductor companies. Dibiaggio L., Nasiriyar M., Nesta L., 2014, Research Policy, 43 (9), 1582–1593.

Technical intelligence approach: Determining patent trends in open die forging. Rodriguez M., Palacios A., Cortez D., 2014, Journal of Intelligence Studies in Business, 4 (1), 5–15.

Technological capabilities for innovation activities across Europe: Evidence from wind, solar and bioenergy technologies. Corsatea T.D., 2014, Renewable and Sustainable Energy Reviews, 37, 469–479.

Technological dynamics: An empirical study in mobile telecommunications. Mei H.-C., Lo S., Sher P.J., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921054, 2771–2779.

Technology effect phrase extraction in Chinese patent abstracts. Liu D., Peng Z., Liu B., Chen X., Guo Y., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8709 LNCS, 141–152.

Technology-industry networks in technology commercialization: Evidence from Korean university patents. Cho Y., Kim W., 2014, Scientometrics, 98 (3), 1785–1810.

Technology opportunity identification customized to the technological capability of SMEs through two-stage patent analysis. Lee Y., Kim S.Y., Song I., Park Y., Shin J., 2014, Scientometrics, 100 (1), 227–244.

Technology portfolio, patent litigation probability and firm performance. Lee M., Su H.-N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921136, 870–878.

The Albuquerque model and efficiency indicators in national scientific productivity with respect to manpower and funding in science. Basu A., 2014, Scientometrics, 100 (2), 531–539.

The contribution of syntactic-semantic approach to the search for complementary literatures for scientific or technical discovery. Vicente-Gomila J.M., 2014, Scientometrics, 100 (3), 659–673.

The design and application of the mechanical parts based on the TRIZ theory. Liu S.Y., 2014, Applied Mechanics and Materials, 556–562, 1241–1244.

The design and implementation of patent collaboration managing platform based on cloud architecture. Wang X., Yang Y., Lin X., Chen Y., Zhang J., 2014, Proceedings of the IEEE International Conference on Software Engineering and Service Sciences, ICSESS, http://dx.doi.org/10.1109/ICSESS.2014.6933704, 872–875.

The development status and its countermeasures about the wind power industry in China. Meng H., Wang Y., 2014, WIT Transactions on Engineering Sciences, 88, 263–270.

The effect of performance-based research funding on output of R&D results in the Czech Republic. Vanecek J., 2014, Scientometrics, 98 (1), 657–681.

The greater scattering phenomenon beyond bradford's law in patent citation. Huang M.-H., Huang W.-T., Chang C.-C., Chen D.-Z., Lin C.-P., 2014, Journal of the Association for Information Science and Technology, 65 (9), 1917–1928.

The impact of local and external university knowledge on the creation of knowledge-intensive firms: Evidence from the Italian

case. Bonaccorsi A., Colombo M.G., Guerini M., Rossi-Lamastra C., 2014, Small Business Economics, 43 (2), 261–287.

The influence of R&D partnership network on firm performance based on the perspective of social network: The case of Taiwan LED sector. Hsueh C.-C., Wang C.-C., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921276, 3163–3167.

The longitudinal impact of academic patenting on publishing behavior: Evidences from Taiwan (2001–2010). Tsai-Lin T.-F., Chang Y.-C., Katzy B.R., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921087, 3263–3271.

The patent analysis as a tool for the identification of the paths of innovation: The case of cocoa-based functional foods [L'Analisi brevettuale come strumento per l'individuazione dei percorsi di innovations: Il caso degli alimenti funzionali a base di cacao]. Ventura V., Ferrazzi G., Frisio D.G., 2014, Industrie Alimentari, 53 (546), 36–42.

The patent landscape of siRNA nanoparticle delivery. Esmond R.W., Chung A.K.-H., 2014, Nanotechnology Law and Business, 11 (1), 15–28.

The practice of non-patent references (NPR) analysis to evaluate the impact of academic journals. Liaw Y.-C., Fan C.-Y., Chan T.-Y., Chiang C.-H., 2014, Proceedings of the 2014 IEEE 18th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2014, http://dx.doi.org/10.1109/CSCWD.2014.6846837, 175–180.

The reason to form a 'Keiretsu' in terms of technology transfer. Inuzuka A., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921202, 3246–3249.

The research on technological innovation of Chinese automobile industry based on patent mapping. Gaoa X., Songa W., Peng X., 2014, WIT Transactions on Information and Communication Technologies, 52, 819–825.

The role of cross-national knowledge on organizational ambidexterity: A case of the global pharmaceutical industry. Dunlap D., Marion T., Friar J., 2014, Management Learning, 45 (4), 458–476.

The role of early-career factors in the formation of serial academic inventors. Lawson C., Sterzi V., 2014, Science and Public Policy, 41 (4), sct076, 464–479.

The role of knowledge variety and intensity for regional innovation. Tavassoli S., Carbonara N., 2014, Small Business Economics, 43 (2), 493–509.

The study on patent acquisition from complementarity and supplementarity: Evidence from Smartphones of Apple and Samsung. Chang P.-C., Chang Y.-H., Su F.-P., Chen S.-J., Lai K.K., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921258, 2996–3003.

The technological roots of computer graphics. Perez Molina E., 2014, IEEE Annals of the History of Computing, 36 (3), 6880248, 30–41.

The technology market, FDI and innovation in China: An empirical analysis based on provincial panel data. Shi L.-J., Li R., 2014, International Conference on Management Science and Engineering - Annual Conference Proceedings, http://dx.doi.org/10.1109/ICMSE.2014.6930419, 1565–1569.

Tracing evolving trends in printed electronics using patent information. Yoon J., Park Y., Kim M., Lee J., Lee D., 2014, Journal of Nanoparticle Research, 16 (7), 2471.

Tracing the ultracapacitor commercialization pathway. Schultz L.I., Querques N.P., 2014, Renewable and Sustainable Energy Reviews, 39, 1119–1126.

Trends and typology of emerging antenna propagation technologies identified by citation network analysis. Takano Y., Kajikawa Y., Ando M., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921363, 2872–2881.

Two Centuries of Glass Research: Historical Trends, Current Status, and Grand Challenges for the Future. Mauro J.C., Zanotto E.D., 2014, International Journal of Applied Glass Science, 5 (3), 313–327.

Two-dimensional effort in patent-race games and rent-seeking contests: The case of telephony. Faria J.R., Mixon Jr. F.G., Caudill S.B., Wineke S.J., 2014, Games, 5 (2), 116–126.

Understanding patent portfolio and development strategy of 3D printing technology. Chu Y.-T., Su H.-N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921153, 1407–1415.

Understanding the dynamic nature of technological change using trajectory identification based on patent citation network in the Electric Vehicles industry. Yuan F., Miyazaki K., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921196, 2780–2790.

University-owned and university-invented patents: A network analysis on two Italian universities. Capellari S., De Stefano D., 2014, Scientometrics, 99 (2), 313–329.

Urban centers and networks of co-invention in American biotechnology. hUallachain B.O., Lee D.-S., 2014, Annals of Regional Science, 52 (3), 799–823.

Using the patterns of invention in the patent literature to predict disruption. Hipple J., 2014, Process Development Division 2014 - Core Programming Area at the 2014 AIChE Spring Meeting and 10th Global Congress on Process Safety, 4–18.

Validating the usefulness of examiners' forward citations from the viewpoint of applicants' self-selection during the patent application procedure. Yasukawa S., Kano S., 2014, Scientometrics, 99 (3), 895–909.

Valuing patents utilizing consensual dynamics in a real options framework. Lawryshyn Y., Collan M., Luukka P., Fedrizzi M., 2014, IIE Annual Conference and Expo 2014, 486–496.

Visualizing knowledge space: A case study of Chinese licensed technology, 2000–2012. Wang Y., Pan X., Wang X., Chen J., Ning L., Qin Y., 2014, Scientometrics, 98 (3), 1935–1954.

What patents are used as collateral?-An empirical analysis of patent reassignment data. Fischer, T., Ringler, P., 2014, Journal of Business Venturing, 29 (5), 633–650.

Worldwide patent map analysis of mechanization technologies relating to field crop production II: A case of corn. Wang X., Yuan Y., Yi Z., Yu Z., 2014, International Agricultural Engineering Journal, 23 (2), 25–34.

Worldwide patent map analysis of mechanization technologies relating to field crop production i: A case study on rice. Yi Z.,

Wang X., Hu Y., Yu Z., 2014, International Agricultural Engineering Journal, 23 (2), 15–24.

Knowledge combination modeling: The measurement of knowledge similarity between different technological domains. Nakamura H., Suzuki S., Sakata I., Kajikawa Y., 2014, Technological Forecasting and Social Change, http://dx.doi.org/10.1016/j.techfore.2014.09.009.

Dynamics in ICT cooperation networks in selected German ICT clusters. Schroder C., 2014, International Economics and Economic Policy, 11 (41671), 197–230.

Firm boundaries matter: Evidence from conglomerates and R&D activity. Seru A., 2014, Journal of Financial Economics, 111 (2), 381–405.

Technological diversity and inventor networks. Cecere G., Ozman M., 2014, Economics of Innovation and New Technology, 23 (2), 161–178.

Evolution of innovation cooperation networks in the marine industry. Qiu F.-X., 2014, Applied Mechanics and Materials, 496–500, 2884–2887.

Ambition is nothing without focus: Compensating for negative transfer of experience in R&D. Ghosh A., Martin X., Pennings J.M., Wezel F.C., 2014, Organization Science, 25 (2), 572–590.

Analysis of patent documents with weighted association rules. Altuntas S., Dereli T., Kusiak A., 2014, Technological Forecasting and Social Change, http://dx.doi.org/10.1016/j.techfore.2014.09.012.

Antitakeover provisions, managerial entrenchment and firm innovation. Chakraborty A., Rzakhanov Z., Sheikh S., 2014, Journal of Economics and Business, 72, 30–43.

Balancing breadth and depth of expertise for innovation: A 3M story. Boh W.F., Evaristo R., Ouderkirk A., 2014, Research Policy, 43 (2), 349–366.

Do eco-innovations harm productivity growth through crowding out? Results of an extended CDM model for Italy. Marin G., 2014, Research Policy, 43 (2), 301–317.

Energy security and climate change: How oil endowment influences alternative vehicle innovation. Kim J.E., 2014, Energy Policy, 66, 400–410.

Innovation, the diesel engine and vehicle markets: Evidence from OECD engine patents. Bonilla D., Bishop J.D.K., Axon C.J., Banister D., 2014, Transportation Research Part D: Transport and Environment, 27, 51–58.

Technological trajectories in the automotive industry: Are hydrogen technologies still a possibility? Rizzi F., Annunziata E., Liberati G., Frey M., 2014, Journal of Cleaner Production, 66, 328–336.

The moderating effects of knowledge characteristics of firms on the financial value of innovative technology products. Liu X., Yeung A.C.L., Lo C.K.Y., Cheng T.C.E., 2014, Journal of Operations Management, 32 (3), 79–87.

Examining open-endedness of expectations in emerging technological fields: The case of cellulosic ethanol. Gustafsson R., Kuusi O., Meyer M., 2014, Technological Forecasting and Social Change, http://dx.doi.org/10.1016/j.techfore.2014.02.008.

Trade in ideas: outsourcing and knowledge spillovers. Benz S., Larch M., Zimmer M., 2014, International Economics and Economic Policy, 1–17.

Analyzing Taiwan's patenting performance: Comparing us patents and triadic patent families. Chen D.-Z., Huang W.-T., Huang M.-H., 2014, Malaysian Journal of Library and Information Science, 19 (1), 51–70.

Visualizing and mapping the research on patents in information science and management science. Gui-Feng L., Hua-Ping S., Xin-Ping S., 2014, Malaysian Journal of Library and Information Science, 19 (1), 87–103.

A review of shape memory alloy research, applications and opportunities. Mohd Jani J., Leary M., Subic A., Gibson M.A., 2014, Materials and Design, 56, 1078–1113.

International technology spillovers and innovation: Evidence from Taiwanese high-tech firms. Hsu J., Chuang Y.-P., 2014, Journal of International Trade and Economic Development, 23 (3), 387–401.

Relationship between educational indicators and research outcomes in a panel of top twenty nations: Windows of opportunity. Akhmat G., Zaman K., Shukui T., Javed Y., Khan M.M., 2014, Journal of Informetrics, 8 (2), 349–361.

Science park, triple helix, and regional innovative capacity: Province-level evidence from China. Jongwanich J., Kohpaiboon A., Yang C.-H., 2014, Journal of the Asia Pacific Economy, 19 (2), 333–352.

The nexus between labor diversity and firm's innovation. Parrotta P., Pozzoli D., Pytlikova M., 2014, Journal of Population Economics, 27 (2), 303–364.

Mapping the evolving patterns of patent assignees' collaboration networks and identifying the collaboration potential. Chen Y., Fang S., 2014, Scientometrics, 101 (2), 1215–1231.

Identifying SCI covered publications within non-patent references in U.S. utility patents. Shirabe M., 2014, Scientometrics, 101 (2), 999–1014.

Factors favoring innovation from a regional perspective: A comparison of patents and trademarks. Carree M., Piergiovanni R., Santarelli E., Verheul I., 2014, International Entrepreneurship and Management Journal, http://dx.doi.org/10.1007/s11365-014-0313-8.

On the spillovers between patents and innovation in Japan. Guo J., 2014, Journal of Economics and Finance, http://dx.doi.org/10.1007/s12197-014-9284-4.

Proximity, network formation and inventive performance: in search of the proximity paradox. Cassi L., Plunket A., 2014, The Annals of Regional Science, 53 (2), 395–422.

How to measure technological distance in collaborations - The case of electric mobility. vom Stein N., Sick N., Leker J., 2014, Technological Forecasting and Social Change, http://dx.doi.org/10.1016/j.techfore.2014.05.001.

R&D dynamics and scientific breakthroughs in HIV/AIDS drugs development: the case of Integrase Inhibitors. Winnink J.J., Tijssen R.J.W., 2014, Scientometrics, 101 (1), 1–16.

Semantic compared cross impact analysis. Thorleuchter D., Van Den Poel D., 2014, Expert Systems with Applications, 41 (7), 3477–3483.

Analyzing technology impact networks for R&D planning using patents: combined application of network approaches. Ko S.-S., Ko N., Kim D., Park H., Yoon J., 2014, Scientometrics, 101 (1), 917–936.

Can the technological impact of academic journals be evaluated? The practice of non-patent reference (NPR) analysis. Liaw Y.-C., Chan T.-Y., Fan C.-Y., Chiang C.-H., 2014, Scientometrics, 101 (1), 17–37.

A patent time series processing component for technology intelligence by trend identification functionality. Chen H., Zhang G., Zhu D., Lu J., 2015, Neural Computing and Applications, 26 (2), 345–353.

Novelty-focused patent mapping for technology opportunity analysis. Lee C., Kang B., Shin J., 2015, Technological Forecasting and Social Change, 90 (B), 355–365.

On the relationship between innovation and wage inequality: New evidence from canadian cities. Breau S., Kogler D.F., Bolton K.C., 2014, Economic Geography, 90 (4), 351–373.

Measuring the dynamics of an innovation system using patent data: a case study of South Korea, 2001–20, http://dx.doi.org/10. Stek P.E., van Geenhuizen M.S., 2014, Quality & Quantity, http://dx.doi.org/10.1007/s11135-014-0045-4.

Identifying technological topics and institution-topic distribution probability for patent competitive intelligence analysis: a case study in LTE technology. Wang B., Liu S., Ding K., Liu Z., Xu J., 2014, Scientometrics, 101 (1), 685–704.

A methodology for unveiling global innovation networks: patent citations as clues to cross border knowledge flows. Ribeiro L.C., Kruss G., Britto G., Bernardes A.T., da Motta e Albuquerque E., 2014, Scientometrics, 101 (1), 61–83.

A graph kernel approach for detecting core patents and patent groups. Kim D., Lee B., Lee H.J., Lee S.P., Moon Y., Jeong M.K., 2014, IEEE Intelligent Systems, 29 (4), 6908908, 44–51.

The evolution of waste into a resource: Examining innovation in technologies reusing coal combustion by-products using patent data. Park J.Y., 2014, Research Policy, 43 (10), 1816–1826.

Total factor productivity, domestic knowledge accumulation, and international knowledge spillovers in the second half of the twentieth century. Sanchis T., Sanchis-Llopis J.A., Esteve V., Cubel A., 2014, Cliometrica, http://dx.doi.org/10.1007/s11698-014-0114-x.

Technological pervasiveness and variety of innovators in Green ICT: A patent-based analysis. Cecere G., Corrocher N., Gossart C., Ozman M., 2014, Research Policy, 43 (10), 1827–1839.

Co-evolutionary Patterns in Regional Knowledge Bases and Economic Structure: Evidence from European Regions. Quatraro F., 2014, Regional Studies, http://dx.doi.org/10.1080/00343404.2014.927952.

How to kill inventors: testing the Massacrator© algorithm for inventor disambiguation. Pezzoni M., Lissoni F., Tarasconi G., 2014, Scientometrics, 101 (1), 477–504.

Monitoring innovation in electrochemical energy storage technologies: A patent-based approach. Mueller S.C., Sandner P.G., Welpe I.M., 2015, Applied Energy, 137, 537–544.

Analyzing patent topical information to identify technology pathways and potential opportunities. Ma J., Porter A.L., 2015, Scientometrics, 102 (1), 811–827.

On improvement rates for renewable energy technologies: Solar PV, wind turbines, capacitors, and batteries. Benson C.L., Magee C.L., 2014, Renewable Energy, 68, 745–751.

Identifying patterns in rare earth element patents based on text and data mining. Ju Y., Sohn S.Y., 2015, Scientometrics, 102 (1), 389–410.

A new industry creation and originality: Insight from the funding sources of university patents. Guerzoni M., Taylor Aldridge T., Audretsch D.B., Desai S., 2014, Research Policy, 43 (10), 1697–1706.

Patents, Competition, and Firms' Innovation Incentives. Beneito P., Rochina-Barrachina M.E., Sanchis A., 2014, Industry and Innovation, 21 (4).

Is geographic nearness important for trading ideas? Evidence from the US. Drivas K., Economidou C., 2014, The Journal of Technology Transfer, http://dx.doi.org/10.1007/s10961-014-9360-0.

European Integration and Knowledge Flows across European Regions. Cappelli R., Montobbio F., 2014, Regional Studies, http://dx.doi.org/10.1080/00343404.2014.931572.

The emergence of new technology-based sectors in European regions: A proximity-based analysis of nanotechnology. Colombelli A., Krafft J., Quatraro F., 2014, Research Policy, 43 (10), 1681–1696.

The idiosyncrasy of research and development efficiency across types of small- and medium-sized enterprises: Evidence from Korea. Lee K., Yoon B., 2014, R and D Management, http://dx.doi.org/10.1111/radm.12082.

Light emitting diodes and the lighting revolution: The emergence of a solid-state lighting industry. Sanderson S.W., Simons K.L., 2014, Research Policy, 43 (10), 1730–1746.

Diversity in patterns of industry evolution: How an intrapreneurial regime contributed to the emergence of the service robot industry. Lechevalier S., Nishimura J., Storz C., 2014, Research Policy, 43 (10), 1716–1729.

Related Variety, Unrelated Variety and Technological Breakthroughs: An analysis of US State-Level Patenting. Castaldi C., Frenken K., Los B., 2014, Regional Studies, http://dx.doi.org/10.1080/00343404.2014.940305.

Does the nano-patent 'Gold rush' lead to entrepreneurial-driven growth? Some policy lessons from China and Japan. Baglieri D., Cesaroni F., Orsi L., 2014, Technovation, 34 (12), 746–761.

Patent analysis to identify shale gas development in China and the United States. Lee W.J., Sohn S.Y., 2014, Energy Policy, 74, 111–115.

Exploring technological opportunities by mining the gaps between science and technology: Microalgal biofuels. Wang M.-Y., Fang S.-C., Chang Y.-H., 2014, Technological Forecasting and Social Change, http://dx.doi.org/10.1016/j.techfore.2014.07.008.

One year ahead! Investigating the time lag between patent publication and market launch: Insights from a longitudinal study in the automotive industry. Gerken J.M., Moehrle M.G., Walter L., 2014, R and D Management, http://dx.doi.org/10.1111/radm.12085.

Regional Aspects of Collaborative Invention Across National Innovation Systems. O hUallachain B., Kane K., 2014, European Planning Studies, http://dx.doi.org/10.1080/09654313.2014.942602.

International technology sourcing between a developing country and the rest of the world. A case study of China. Nepelski D., De Prato G., 2015, Technovation, 35, 12–21.

Borders and distance in knowledge spillovers: Dying over time or dying with age?-Evidence from patent citations. Li Y.A., 2014, European Economic Review, 71, 152–172.

Researchers' participation in standardisation: a case study from a public research institute in Germany. Zi A., Blind K., 2014, Journal of Technology Transfer, http://dx.doi.org/10.1007/s10961-014-9370-y.

Membrane emulsification technology: Twenty-five years of inventions and research through patent survey. Piacentini E., Drioli E., Giorno L., 2014, Journal of Membrane Science, 468, 410–422.

Understanding the development trends of low-carbon energy technologies: A patent analysis. Albino V., Ardito L., Dangelico R.M., Messeni Petruzzelli A., 2014, Applied Energy, 135, 836–854.

Patent-to-patent versus patent family-to-patent family citations and the impact of an invention. Walter D., 2014, Pharmaceutical Patent Analyst, 3 (3), 219–221.

Patent analytics: current tools and emerging trends. Walter D., Mucke H., Muresan S., Grant J. L., Graves F., Trippe A., Southan C., 2014, Pharmaceutical Patent Analyst, 3 (3), 227–231.

Enabling enterprise semantic search through language technologies: The progressit experience. Basili R., Ciapetti A., Croce D., Marino V., Salvatore P., Storch V., 2014, CEUR Workshop Proceedings, 1127, 51–62.

2.2. Patents

2.2.1. Relating to life sciences and pharmaceuticals

A patent perspective on US stem cell research. Chan A.W.-K., Wong A.Y.-T., Lee H.-M., 2014, Nature Biotechnology, 32 (7), 633–637.

Analysis and simulation of the corporate pharmaceutical patent infringement litigation warning indicator system. Wang Y., 2014, WIT Transactions on Biomedicine and Health, 18, 1251–1258.

Analyzing the brokerage roles of stakeholders in a technological network: A study of GMO plant technologies. Ho M.H., Cheo H.Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921255, 3144–3154.

Bioprospecting in the high seas: Existing rights and obligations in view of a new legal regime for marine areas beyond national jurisdiction. Jorem A., Tvedt M.W., 2014, International Journal of Marine and Coastal Law, 29 (2), 321–343.

Combined language processing methods and mash-up system for improving retrieval in diabetes related patents. Chorbev I., Davcev D., Boshnakoska D., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8849, 10–21.

Effects of Trade Related Intellectual Property Rights on the research and development expenditure of Indian pharmaceutical industry. Banerjee T., Nayak A., 2014, Journal of Pharmaceutical Health Services Research, 5 (2), 89–94.

Exploring innovation in stem cell and regenerative medicine in Japan: The power of the consortium-based approach. Munisi H.I., Xie Z., Sengoku S., 2014, Regenerative Medicine, 9 (4), 467–477.

Exploring temporal relationships between scientific and technical fronts: A case of biotechnology field. Huang M.-H., Chen S.-H., Lin C.-Y., Chen D.-Z., 2014, Scientometrics, 98 (2), 1085–1100.

Extending the limits of protection of pharmaceutical patents and data outside the EU - Is there a need to rebalance? Acquah D., 2014, IIC International Review of Intellectual Property and Competition Law, 45 (3), 256–286.

First CRISPR-Cas patent opens race to stake out intellectual property. Sheridan C., 2014, Nature Biotechnology, 32 (7), 599–601.

How can we specify the second use drugs from patent information?: R&D on the second use drugs may lead to further development of pharmaceutical industries. Tsutani N., Tanaka Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921141, 1397–1406.

India's first compulsory license: Its impact on the Indian pharmaceutical market as well as the world market. Mitsumori Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921179, 1437–1443.

Innovations in Indian drug and pharmaceutical industry: Have they impacted exports? Tyagi S., Mahajan V., Nauriyal D.K., 2014, Journal of Intellectual Property Rights, 19 (4), 243–252.

Intellectual property rights and benefit sharing from marine genetic resources in areas beyond national jurisdiction: Current discussions and regulatory options. Chiarolla C., 2014, Queen Mary Journal of Intellectual Property, 4 (3), 171–194.

Knowledge characteristics and the dynamics of technological alliances in pharmaceuticals: Empirical evidence from Europe, US and Japan. Krafft J., Quatraro F., Saviotti P.P., 2014, Journal of Evolutionary Economics, 24 (3), 587–622.

La tentative PIPRA (public intellectual property resource for agriculture) un « commun » en propriété intellectuelle sur les biotechnologies agricoles ? Vanuxem S., 2014, Revue Internationale de Droit Economique, 28 (2), 235–259.

Limitations on patenting inventions based on marine genetic resources of areas beyond national jurisdiction. He H., 2014, International Journal of Marine and Coastal Law, 29 (3), 521–545.

Making tenofovir accessible in the Brazilian public health system: Patent conflicts and generic production. Veras J., 2014, Developing World Bioethics, 14 (2), 92–100.

Nano-enabled drug delivery: A research profile. Zhou X., Porter A.L., Robinson D.K.R., Shim M.S., Guo Y., 2014, Nanomedicine: Nanotechnology, Biology, and Medicine, 10 (5), 889–896.

Nature bank and the queensland compound library: Unique international resources at the eskitis institute for drug discovery. Camp D., Newman S., Pham N.B., Quinn R.J., 2014, Combinatorial Chemistry and High Throughput Screening, 17 (3), 201–209.

Patents and the obligation to protect health: examining the significance of human rights considerations in the protection of pharmaceutical patents. Owoeye O.A., 2014, Journal of law and medicine, 21 (4), 900–919.

Refined R&D indicators for pharmaceutical industry. Jibu M., Osabe Y., 2014, Lecture Notes in Electrical Engineering, 309 LNEE, 549–554.

Research and patent analysis on sensor technology applied in pilotless automobile. Chen Y., Zhang Y.-W., Chen L., 2014, Gongneng Cailiao yu Qijian Xuebao/Journal of Functional Materials and Devices, 20 (1), 89–92.

Taiwan's pharmaceuticals: A failure of the sectoral system of innovation? Hu M.-C., Hung S.-C., 2014, Technological Forecasting and Social Change, 88, 162–176.

The current status and value creation of unlisted Biotech Drug Discovery/Development Firms (Biotech DDFs) in Japan: A holistic approach. Sakurai M., Munisi H.I., Kakihara H., Sengoku S., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921268, 3612–3620.

The Impact of Patents on Innovation, Technology Transfer and Health: A Pre- and Post-TRIPs Analysis of India's Pharmaceutical Industry. Horner R., 2014, New Political Economy, 19 (3), 384–406.

Trends in patent filings depict a decade of research into the genome-based technologies. Mercer R., Williams G., 2014, Journal of Commercial Biotechnology, 20 (4), 49–54.

Understanding medical device patenting and clinical trials for product leadership. Rekha G.N., Arunagiri S., Mathew M., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921279, 3598–3604.

What the patent dance of the biosimilars act means for biosimilars. Fazzolare D.A., Brougher J.T., 2014, Journal of Commercial Biotechnology, 20 (4), 31–36.

Knowledge search, spillover and creation capability in India's pharmaceutical industry. Tseng C.-Y., Pai D.-C., 2014, Technology Analysis and Strategic Management, 26 (2), 207–222.

Nanoparticles applied to antineoplastic agents: a patent landscape. Iolanda M Fierro, Maria Simone de Menezes Alencar, Flavia Maria Lins Mendes, Cristina d'Urso de Souza Mendes, Bernardo Furtado Nunes, Adelaide Maria de Souza Antunes, 2014, Pharmaceutical Patent Analyst, 3 (6), 613–623.

2.2.2. Relating to software

Non-Practical Entities: Business Method Patents and the Digitization of Culture. Morris J.W., 2014, Critical Studies in Media Communication, 31 (3), 212–229.

The choice of legal protection mode of computer software. Li Y.X., 2014, Advanced Materials Research, 926–930, 2827–2831.

Alice v. CLS Bank: Are US business-method and software patents doomed? Part 1. Stern R.H., 2014, IEEE Micro, 34 (5), 78, 64–69.

Current issues with patenting software. Hsieh D., 2014, IEEE Potentials, 33 (6), 6954526, 16–20.

2.2.3. Policy and strategic issues

Analysing the pitfalls of Indian patent injunctions based on fear of infringement. Lath A., 2014, Journal of Intellectual Property Rights, 19 (4), 253–259.

Analysis of China's technology introduction of clean energy based on the perspective of intellectual property rights. Shen K.Y., Lv S.Y., 2014, Advanced Materials Research, 962–965, 1733–1736.

Challenges in public and private domains will shape the future of intellectual property. de Wit S., 2014, NTUT Journal of Intellectual Property Law and Management, 3 (1), 21–33.

Chinese entrepreneurs focus on innovation: Ancient philosophy promotes economic development. [No author name available], 2014, Strategic Direction, 30 (1), 7–10.

Chip design in China and India: Multinationals, industry structure and development outcomes in the integrated circuit industry. Fuller D.B., 2014, Technological Forecasting and Social Change, 81 (1), 1–10.

Differentiated standards and patent pools. Schiff A., Aoki R., 2014, Journal of Industrial Economics, 62 (2), 376.

Do non-competition agreements lead firms to pursue risky R&D projects? Conti R., 2014, Strategic Management Journal, 35 (8), 1230–1248.

Driving forces of technological change: The relation between population growth and technological innovation analysis of the optimal interaction across countries. Coccia M., 2014, Technological Forecasting and Social Change, 82 (1), 52–65.

Effects of organisation's dynamic capabilities on the duration of patent commercialisation: The case of Taiwan biotechnological industry. Fang S.-C., Wang M.-Y., Wu F.-S., Chen W.-Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921193, 1189–1200.

Effects of R&D spending on innovation by Irish and foreign-owned businesses. Doran J., Jordan D., O'Leary E., 2014, Journal of the Statistical and Social Inquiry Society of Ireland, 42, 15–41.

Efficiency of the R and D sector in the EU-27 at the regional level: An application of DEA. Aristovnik A., 2014, Lex Localis, 12 (3), 519–532.

Empirical research about the regional innovation capability based on China's patent application activities. Qi Y., Liu Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921244, 365–369.

Environmental policies, competition and innovation in renewable energy. Nesta L., Vona F., Nicolli F., 2014, Journal of Environmental Economics and Management, 67 (3), 396–411.

Evaluating the innovation performance of technology mergers and acquisitions in the equipment manufacturing industry. Huang L., Wang Y., Shang L., Guo Y., Porter A.L., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921311, 3020–3030.

Examining the patterns of innovation in low carbon energy science and technology: Publications and patents of Asian emerging economies. Wong C.-Y., Fatimah Mohamad Z., Keng Z.-X., Ariff Azizan S., 2014, Energy Policy, 73, 789–802.

Exiting with grace - and profit. Seetzen H., 2014, Information Display, 30 (1), 42–46.

Explaining institutional change in international patent politics. Rabitz F., 2014, Third World Quarterly, 35 (9), 1582–1597.

Government support for SME innovations in the regional industries: The case of government financial support program in South Korea. Doh S., Kim B., 2014, Research Policy, 43 (9), 1557–1569.

How does openness affect innovation? Evidence from national key laboratories in China. Lv P., 2014, Science and Public Policy, 41 (2), sct045, 180–193.

Human capital as a long-term driving force for the national independent innovation: Evidence from Japanese innovation transformation. Gao X.-R., Hu X.-J., Zhang W., 2014, International Conference on Management Science and Engineering - Annual Conference Proceedings, http://dx.doi.org/10.1109/ICMSE.2014.6930342, 1031–1040.

Impact of collaboration and funding on the propensity to patent of Canadian biotechnology firms 1999–2005. Beaudry C., 2014, International Journal of Biotechnology, 13 (1–3), 22–52.

Implicit patent alliance acquiring the appropriability of innovation: A case study on inkjet printer companies. Goto Y., Gemba K., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921231, 1471–1482.

Innovation in the energy sector: Lessons learnt from R&D expenditures and patents in selected IEA countries. Bointner R., 2014, Energy Policy, 73, 733–747.

Innovation or imitation? The effect of spillovers and competitive pressure on firms' R&D strategy choice. Slivko O., Theilen B., 2014, Journal of Economics/ Zeitschrift fur Nationalokonomie, 112 (3), 253–282.

Innovation Subsidies: Does the Funding Source Matter for Innovation Intensity and Performance? Empirical Evidence from Germany. Czarnitzki D., Lopes-Bento C., 2014, Industry and Innovation, 21 (5), 380–409.

Innovation values in the radio frequency identification device industry. Tsao C.-C., Fan P.-S., Fan C.-Y., Chang P.-C., 2014, Proceedings of the 2014 IEEE 18th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2014, http://dx.doi.org/10.1109/CSCWD.2014.6846833, 153–158.

Integrated marketing communications in the commercialisation of intellectual property. Harrer R., Lackner M., 2014, International Journal of Intellectual Property Management, 7 (1–2), 47–56.

Investigating technological innovation competitiveness by the use of patent-based indicators: A global comparison. Lin J.-Y., Su H.-N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921180, 1313–1321.

Knowing when to leap: Transitioning between exploitative and explorative R&D. Mudambi R., Swift T., 2014, Strategic Management Journal, 35 (1), 126–145.

Knowledge-intensive entrepreneurship: sectoral patterns in a sample of European high-tech firms. Breschi S., Lenzi C., Malerba F., Mancusi M.L., 2014, Technology Analysis and Strategic Management, 26 (7), 751–764.

Learning to be Edison: Inventors, organizations, and breakthrough inventions. Conti R., Gambardella A., Mariani M., 2014, Organization Science, 25 (3), 833–849.

Linkage between patent management and technological innovation performance: New evidence from Chinese high-tech enterprises. Cao Y., Sun H.-L., Cao X.-Z., Jiang Z.-Y., 2014, International Conference on Management Science and Engineering - Annual Conference Proceedings, http://dx.doi.org/10.1109/ICMSE.2014.6930437, 1692–1697.

Low-carbon patented technology licensing in China: Market and policy. Caixia Z., 2014, WIT Transactions on Engineering Sciences, 84 (1), 731–737.

Micro evidence on international patenting. Maurseth P.B., Svensson R., 2014, Economics of Innovation and New Technology, 23 (4), 398–422.

Nanomaterials patenting in Brazil: Some considerations for the national regulatory framework. Sant'Anna L.S., Alencar M.S.M., Ferreira A.P., 2014, Scientometrics, 100 (3), 675–686.

NASA Innovation Ecosystem: Host to a Government technology innovation network. Hardash J., Graham C., Decker B., Thompson V., 2014, IEEE Aerospace Conference Proceedings, http://dx.doi.org/10.1109/AERO.2014.6836445.

Patent laws, product life-cycle lengths, and multinational activity. Bilir L.K., 2014, American Economic Review, 104 (7), 1979–2013.

Patents, R&D investments and post-IPO strategies. Vismara S., 2014, Review of Managerial Science, 8 (3), 419–435.

Patents, transaction costs and academic research project choice. Jensen P.H., Webster E., 2014, Economic Record, 90 (289), 179–196.

Primary research related to the design of China's patent pledge system. Zhang H.-F., Chen Q., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921129, 1383–1387.

Problems of enforcement of patent law in China and its ongoing fourth amendment. Zhan Y., 2014, Journal of Intellectual Property Rights, 19 (4), 266–271.

Product innovation processes and the trade-off between product innovation performance and business performance. Lofsten H., 2014, European Journal of Innovation Management, 17 (1), 61–84.

Products as platforms. A framework for designing open source interactive artifacts. Cangiano S., Fornari D., 2014, Proceedings of the Conference on Designing Interactive Systems: Processes, Practices, Methods, and Techniques, DIS, http://dx.doi.org/10.1145/2598784.2598803, 219–222.

Renewing Dynamic Capabilities Globally: An Empirical Study of the World's Largest MNCs. Sambharya R.B., Lee J., 2014, Management International Review, 54 (2), 137–169.

Research on environmental management with intellectual property rights. Li J., Li Q., 2014, Energy Education Science and Technology Part A: Energy Science and Research, 32 (3), 1721–1728.

Separating patent wheat from chaff: Would the US benefit from adopting patent post-grant review? Graham S.J.H., Harhoff D., 2014, Research Policy, 43 (9), 1649–1659.

Sequential R&D and blocking patents in the dynamics of growth. Cozzi G., Galli S., 2014, Journal of Economic Growth, 19 (2), 183–219.

The optimal time path of clean energy R&D policy when patents have finite lifetime. Gerlagh R., Kverndokk S., Rosendahl K.E., 2014, Journal of Environmental Economics and Management, 67 (1), 2–19.

The relationships between the patent deployment strategy and patent value. Chang K.-C., Hao J., Chen C., Yuan C.-C., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921089, 1336–1340.

The strategic IP insight platform (SIIP): A foundation for discovery. Lelescu A., Langston B., Louie E., Cheng I., Labrie J., Colino J., Anderson L., Kato L., Chen Y., 2014, Annual SRII Global Conference, SRII,6879662, 27–34.

Use it or lose it: Assessing the compatibility of the Paris convention and TRIPS agreement with respect to local working requirements. Cottier T., Lalani S., Temmerman M., 2014, Journal of International Economic Law, 17 (2), 437–471.

World patent practice analysis in the area of energy-efficient and energy-saving technologies. Sadriev A.R., 2014, Mediterranean Journal of Social Sciences, 5 (18 SPEC. ISSUE), 283–288.

When does selling make you wiser? Impact of licensing on Chinese firms' patenting propensity. Srivastava M.K., Wang T., 2014, The Journal of Technology Transfer, http://dx.doi.org/10.1007/s10961-014-9354-y.

2.2.4. *Other patent topics*

3D IP.
Gaff B.M., 2014, Computer, 47 (10), 6928766, 9–11.
A mathematical structure for modeling inventions.

Wegner B., Schindler S., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8543 LNAI, 138–152.

A process for knowledge transformation and knowledge representation of patent law. Ramakrishna S., Paschke A., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8620 LNCS, 311–328.

Bargaining in patent licensing negotiations under stochastic environments: An experimental study. Yang Y.-N., Chiu Y.-J., 2014, Mathematical Problems in Engineering, 2014,976450.

Brazil's implementation of TRIPS flexibilities: Ambitious missions, early implementation, and the plans for reform. Sundaram J., 2014, Information and Communications Technology Law, 23 (2), 81–116.

Co-evolution of markets for technology and markets for products in mobile telecommunication standards: Examination of essential patents for GSM, WCDMA, and LTE standards. Yang S., Jung T., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921246, 61–67.

Corporate taxation and the quality of research and development. Ernst C., Richter K., Riedel N., 2014, International Tax and Public Finance, 21 (4), 694–719.

Defining patent quality. Guerrini C.J., 2014, Fordham Law Review, 82 (6), 3091–3143.

Demographic patterns and trends in patenting: Gender, age, and education of inventors. Jung T., Ejermo O., 2014, Technological Forecasting and Social Change, 86, 110–124.

Does familiarity breed contempt among judges deciding patent cases? Lemley M.A., Li S., Urban J.M., 2014, Stanford Law Review, 66 (5), 1121–1158.

Drivers of Innovation in the Malaysian services sector: An analysis based on firm-level data. Narayanan S., Parvin Hosseini M., 2014, Institutions and Economies, 6 (1), 95–118.

Exploring the relationships between science and technology input and output indicators: A comparison between developed, fast developing World and Turkey. Yildirim H., Yildirim N., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921343, 155–163.

Find the right transferee for patents by ego patent citation network: Evidence from Kodak. Lai K.-K., Chen S.-J., Chang Y.-H., Yang W.-G., Weng C.S., 2014, 2014 International Conference on Engineering, Technology and Innovation: Engineering Responsible Innovation in Products and Services, ICE 2014, http://dx.doi.org/10.1109/ICE.2014.6871571.

Intellectual property course for engineering students. Valenzuela-Valdes J.F., Pardo P.J., Padilla J.L., Padilla P., 2014, International Journal of Engineering Education, 30 (6), 1419–1424.

Intellectual property rights and the evolution of scientific journals as knowledge platforms. Fehder D.C., Murray F., Stern S., 2014, International Journal of Industrial Organization, 36, 83–94.

Interpersonal patent relations: Persuasion pointers to novelty, creativity, and ownership in U.S. patent property claiming. Pellon I.A., 2014, Linguistic Insights, 191, 255–278.

Introduction of an objective model to measure open innovation and its application to the information technology convergence sector. Yun J.J., Avvari M.V., Jeong E.-S., Lim D.-W., 2014, International Journal of Technology, Policy and Management, 14 (4), 383–400.

Lean philosophies in economic development processes. Kringen M., Karlin J., Piper A., 2014, IIE Annual Conference and Expo 2014, 4058–4065.

Litigation in the middle: The context of patent-infringement injunctions. Golden J.M., 2014, Texas Law Review, 92 (7), 2075–2116.

Moving beyond simple examples: Assessing the incremental value rule within standards. Layne-Farrar A., Llobet G., 2014, International Journal of Industrial Organization, 36, 57–69.

Never too old: Engaging retired people inventing the future with MaKey MaKey. Rogers Y., Paay J., Brereton M., Vaisutis K., Marsden G., Vetere F., 2014, Conference on Human Factors in Computing Systems - Proceedings, http://dx.doi.org/10.1145/2556288.2557184, 3913–3922.

O impacto do tempo de pendência das patentes na trajetória de crescimento: Uma análise com base no modelo schumpeteriano de crescimento endógeno com avanço de qualidade. de Moura F.R., Paes N.L., Farias T.A., 2014, Revista Brasileira de Economia, 68 (1), 125–145.

Patent assertion entities: do they impede innovation and technology commercialisation? Hemphill T.A., 2014, Technology Analysis and Strategic Management, 26 (7), 717–731.

Patent enforcement: A review of the literature. Weatherall K., Webster E., 2014, Journal of Economic Surveys, 28 (2), 312–343.

Patent indicators for macroeconomic growth - The value of patents estimated by export volume. Frietsch R., Neuhausler P., Jung T., Van Looy B., 2014, Technovation, 34 (9), 546–558.

Patent infringement by ANDA filing. Pohl M., 2014, Journal of Intellectual Property Rights, 19 (3), 218–222.

Patent law fundamentals for innovators in the ceramic and glass industry. Ritchey S., 2014, American Ceramic Society Bulletin, 93 (3), 28–32.

Patent licensing in spatial models. Lu Y., Poddar S., 2014, Economic Modelling, 42, 250–256.

Patent literatures translation system based on hadoop. Zhang D., Huang H., Huang Y., 2014, Lecture Notes in Electrical Engineering, 309 LNEE, 127–135.

Patent survey to Japanese R&D-directed firms. Saiki T., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6920989, 1431–1436.

Patent trends in ICAR institutes - A review. Suman A., Pandey D., 2014, Journal of Intellectual Property Rights, 19 (4), 260–265.

Per unit vs. ad valorem royalties under asymmetric information. Heywood J.S., Li J., Ye G., 2014, International Journal of Industrial Organization, 37 (1), 38–46.

Performance evaluations of technology transfer offices of major US research universities. Tseng A.A., Raudensky M., 2014, Journal of Technology Management and Innovation, 9 (1), 93–102.

Post OCR correction of Swedish patent text: The difference between reading tongue 'låstunga' and security tab 'låstunga'. Andersson L., Rastas H., Rauber A., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8849, 1–9.

Reasons for choosing mechanisms to protect knowledge and innovations. Olander H., Vanhala M., Hurmelinna-Laukkanen P., 2014, Management Decision, 52 (2), 207–229.

Recent developments in the interplay between patents and standards setting: Lessons for smart grid, metering, and electric vehicle manufacturers. Totten J., Zhai M., 2014, Proceedings of the IEEE Power Engineering Society Transmission and Distribution Conference, 6863550.

Resurrecting the ghostly entrepreneur. Manne H.G., 2014, Review of Austrian Economics, 27 (3), 249–258.

Retroactivity at the federal circuit. Schwartz D.L., 2014, Indiana Law Journal, 89 (4), 1547–1586.

Royalty-Free video coding standards in MPEG [Standards in a Nutshell]. Choi K., Jang E.S., 2014, IEEE Signal Processing Magazine, 31 (1), 6678274, 145–155.

Semi-automated vocabulary building for structured legal English. Ramakrishna S., Paschke A., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8620 LNCS, 201–215.

Settling frand disputes: Is mandatory arbitration a reasonable and nondiscriminatory alternative? Larouche P., Padilla J., Taffet R.S., 2014, Journal of Competition Law and Economics, 10 (3), 581–610.

Spatial Aspects of Innovation Activity in the US. Drivas K., Economidou C., Karkalakos S., 2014, Journal of the Knowledge Economy, 5 (3), 464–480.

Standardizing patent data cleaning in a university technology transfer office. Srihari M., Mathew M., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921269, 1368–1372.

Study on the lagged effects between national innovation capability and innovation investment within the Group of Twenty based on grey correlation analysis. Wang D., Zhao X.-L., Zhang Z.-S., 2014, International Conference on Management Science and Engineering - Annual Conference Proceedings, http://dx.doi.org/10.1109/ICMSE.2014.6930423, 1593–1599.

The case for tailoring patent awards based on time-to-market. Roin B.N., 2014, UCLA Law Review, 61 (3), 672–759.

The choice between formal and informal intellectual property: A review. Hall B., Helmers C., Rogers M., Sena V., 2014, Journal of Economic Literature, 52 (2), 375–423.

The determinants of valuable patents. Chang K.-C., Hao J., Chen C., Yuan C.-C., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921090, 1341–1345.

The growth of idea ownership: Patent infringement and risk management within the chemical process industries. LaVanway P., 2014, Management Division 2014 - Core Programming Area at the 2014 AIChE Spring Meeting and 10th Global Congress on Process Safety, 136–150.

The idiosyncrasy of patent examiners: Effects of experience and attrition. Mann R.J., 2014, Texas Law Review, 92 (7), 2149–2178.

The impact of pool & standard on the patent litigation landscape: A case study of the LED industry. Lan Y., Anna F.H.Y., Cheng Y.-C., Shang-Jyh L., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921075, 1444–1458.

The Inventive, the Educated and the Creative: How Do They Affect Metropolitan Productivity? Lobo J., Mellander C., Stolarick K., Strumsky D., 2014, Industry and Innovation, 21 (2), 155–177.

The significance of prior art. Gaff B.M., Rubinger B., 2014, Computer, 47 (8), 6879726, 9–11.

The structure of the German economy. Benz S., Larch M., Zimmer M., 2014, Applied Economics, 46 (27), 3274–3283.

The study on measurement of the amount of defense patent compensation. Yu X., Qian C., Yan Y., 2014, Proceedings - 2014 6th International Conference on Intelligent Human-Machine Systems and Cybernetics, IHMSC 2014, 2, 6911501, 297–300.

The supreme court and § 101 jurisprudence: Reconciling subject-matter patentability standards and the abstract idea exception. Roux J.D., 2014, University of Illinois Law Review, 2014 (2), 629–662.

Understanding collaboration in the open-source arena. Teixeira J., 2014, ACM International Conference Proceeding Series, http://dx.doi.org/10.1145/2601248.2613086.

Understanding the realities of modern patent litigation. Allison J.R., Lemley M.A., Schwartz D.L., 2014, Texas Law Review, 92 (7), 1769–1801.

Using eye-tracking to investigate patent examiners' information seeking process. Loizides F., Diallo B., 2014, Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics), 8849, 76–81.

Intellectual property protection for video games: A view from the European union. Grosheide F.W., Roerdink H., Thomas K., 2014, Journal of International Commercial Law and Technology, 9 (1), 1–13.

A method for identifying V+N compound nouns in patent machine translation. Li H.Z., Zhou H., Jin Y.H., 2014, Applied Mechanics and Materials, 513–517, 4617–4620.

The quest for expansive intellectual property rights and the failure to disclose known relevant prior art. Steensma H.K., Chari M., Heidl R., 2014, Strategic Management Journal, http://dx.doi.org/10.1002/smj.2279.

Economic growth under two forms of intellectual property rights protection: patents and trade secrets. Suzuki K., 2014, Journal of Economics, http://dx.doi.org/10.1007/s00712-014-0410-8.

University patenting: a comparison of 300 leading universities worldwide. Fisch C.O., Hassel T.M., Sandner P.G., Block J.H., 2014, The Journal of Technology Transfer, http://dx.doi.org/10.1007/s10961-014-9355-x.

Testing the causal relationship between academic patenting and scientific publishing in Germany: Crowding-out or reinforcement? Grimm H.M., Jaenicke J., 2014, The Journal of Technology Transfer, http://dx.doi.org/10.1007/s10961-014-9353-z.

Patent life cycle: New evidence. Hikkerova L., Kammoun N., Lantz J.-S., 2014, Technological Forecasting and Social Change, 88, 313–324.

The additive manufacturing revolution and the corresponding legal landscape. Esmond R.W., Phero G.C., 2014, Virtual and Physical Prototyping, http://dx.doi.org/10.1080/17452759.2014.972661.

Financial payoff in patent alliance: Evolutionary dynamic modeling. Shen Z., Shang Y., 2014, IEEE Transactions on Engineering Management, 61 (4),6841043, 730–737.

Patenting trends in enzyme related microfluidic applications. Avagyan V., Esteban-Bravo M., Vidal-Sanz J.M., 2014, Biochemical Engineering Journal, 92, 53–62.

2.3. Trademarks and domain names

2.3.1. Trademarks

Trademarks as search-engine keywords: Who, what, when? Hyman D.A., Franklyn D.J., 2014, Texas Law Review, 92 (7), 2117–2150.

A coarse-to-fine logo recognition method in video streams. Zhao C., Wang J., Xie C., Lu H., 2014, Proceedings - IEEE International Conference on Multimedia and Expo, http://dx.doi.org/10.1109/ICMEW.2014.6890576.

A linguistic study of the distinctiveness of a trademark. Hu P.-C., 2014, NTUT Journal of Intellectual Property Law and Management, 3 (1), 1–20.

Protecting appearance and atmospherics: Trade dress as a component of retail strategy. Kopp S.W., Langenderfer J., 2014, Journal of Public Policy and Marketing, 33 (1), 34–48.

Proximity comparison modes for logo design. Huang C.I., Guan S.S., Wang W., Wang M.H., Chen R., 2014, Proceedings - 2014 International Symposium on Computer, Consumer and Control, IS3C 2014, http://dx.doi.org/10.1109/IS3C.2014.19, 23–26.

Repositioning Trademark Laws as Tools for Socioeconomic Development: A Case for Legitimizing Comparative Advertising under Nigerian Law. Oyewunmi A.O., 2014, Journal of Developing Societies, 30 (1), 69–90.

The third revision of Chinese trademark law - Analysis and comment. Zhang W., Wei L., Li Y., 2014, IIC International Review of Intellectual Property and Competition Law, 45 (5), 556–586.

Tobacco industry argues domestic trademark laws and international treaties preclude cigarette health warning labels, despite consistent legal advice that the argument is invalid. Crosbie E., Glantz S.A., 2014, Tobacco Control, 23 (3).

Trademark surveys: An undulating path. Diamond S.S., Franklyn D.J., 2014, Texas Law Review, 92 (7), 2029–2073.

Trademarks and venture capital valuation. Block J.H., De Vries G., Schumann J.H., Sandner P., 2014, Journal of Business Venturing, 29 (4), 525–542.

Trademarks, geographical indications and environmental labelling to promote biodiversity: The case of agroforestry coffee in India. Marie-Vivien D., Garcia C.A., Kushalappa C.G., Vaast P., 2014, Development Policy Review, 32 (4), 379–398.

Translation of cosmetics trademarks from the perspective of translation aesthetics. Wang S., 2014, Journal of Language Teaching and Research, 5 (3), 626–630.

Hybrid ensemble of classifiers for logo and trademark symbols recognition. Cyganek B., 2014, Soft Computing, http://dx.doi.org/10.1007/s00500-014-1323-8.

Are Trademark Counts a Valid Indicator of Innovation? Results of an In-Depth Study of New Benelux Trademarks Filed by SMEs. Flikkema M., De Man A.-P., Castaldi C., 2014, Industry and Innovation, 21 (4).

2.3.2. Domain names

XXXtortion? Inferring registration intent in the .XXX TLD. Halvorson T., Levchenko K., Savage S., Voelker G.M., 2014, WWW 2014 - Proceedings of the 23rd International Conference on World Wide Web, http://dx.doi.org/10.1145/2566486.2567995, 901–911.

2.4. Designs

Technology-based design and sustainable economic growth. Luo J., Olechowski A.L., Magee C.L., 2014, Technovation, 34 (11), 663–677.

Design evaluation method for universal product development. Park J., 2014, Advanced Materials Research, 889–890, 1481–1484.

2.5. Other IP; general IP issues

2.5.1. Policy and strategic issues

A survey of intellectual property rights literature from 1971 to 2012: The main path analysis. Lu L.Y.Y., Liu J.S., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921126, 1274–1280.

2.5.2. Other IP issues

A case study on adoptive management innovation in China. Lin H., Su J., 2014, Journal of Organizational Change Management, 27 (1), 83–114.

Can we specify the technical field of know-how by making patent portfolio analysis? Sugimoto, M., Tanaka, Y., 2014, PICMET 2014 - Portland International Center for Management of Engineering and Technology, Proceedings: Infrastructure and Service Integration, 6921008, 1388–1396.

Defensive publishing by a leading firm. Johnson J.P., 2014, Information Economics and Policy, 28 (1), 15–27.

Ethical aspects of “intellectual property” [Ethische aspekte “geistigen eigentums”]. Hamann N., 2014, VOEB-Mitteilungen, 67 (1), 88–108.

Intellectual property protection of layout designs on printed circuit boards - From comparative and chinese perspectives. Shen W., 2014, IIC International Review of Intellectual Property and Competition Law, 45 (1), 6–17.

Māori traditional knowledge and New Zealand patent law: The 2013 act and the dawn of a new era? Lai J.C., 2014, Journal of World Intellectual Property, 17 (41671), 34–46.

Propriété industrielle et biotechnologies végétales : La nova atlantis à propos de la recommandation du haut conseil des biotechnologies. Girard F., Noiville Ch., 2014, Revue Internationale de Droit Economique, 28 (1), 59–109.

Strength of protection for geographical indications: Promotion incentives and welfare effects. Menapace L., Moschini G.C., 2014, American Journal of Agricultural Economics, 96 (4), 1030–1048.

Towards an ethics of creative sound. Andean J., 2014, Organised Sound, 19 (2), 173–181.

2.6. Historical

Patents, what for? The case of Crossley Brothers and the introduction of the gas engine into Spain, c. 1870–1914. Ortiz-Villajos J.M., 2014, Business History, 56 (4), 650–676.

Trademarks and British dominance in consumer goods, 1876–1914. da Silva Lopes T., Guimaraes P., 2014, Economic History Review, 67 (3), 793–817.
