

Subject Index to Volume 24

Application areas	83	Distributed database management system	203
Artificial intelligence	267	Document representation and manipulation	93
Artificial neural network	209	Documentation	147
Assistance	147		
Automated tools	61	Electronic mail	9
Automatic teller machine	53	End user computing	41, 147
Availability	203	End user developed systems	41
Availability evaluation	203	End user system development	1
		End-user satisfaction	147
Back-propagation	159	End-user support	147
Back-propagation algorithm	1	ES development techniques	209
Bankruptcy prediction	159	Evaluation	225
Bibliometrics	339	Expert systems	71, 83
Business schools	183	Expertise	225
Business value	267		
		Failure risk	257
CASE tools	61	Forecasting models	159
Career decisions	23	Formal definition	83
Career paths	23	Fourth generation languages	61
Case study	225	Functionality risk	257
Case-based reasoning	209		
China	283	Global software industry	33
Citation analysis	339	Group decision support systems	121
Client server	267	Group decision-making	247
Commercial supercomputing	291		
Communication of research	339	HRIS	225
Communication patterns	9		
Communication scope	9	Implementation	257
Communication tasks	9	Inductive learning	209
Computer capacity planning	171	Information management	283, 319
Computer mediated communication	9	Information planning	319
Computer security	53	Information retrieval database systems	93
Computer usage	183	Information system planning	1
Connectionist models	1	Information systems practices	61
Consulting	147	Information systems professionals	61
Cross-validation	159	Information technology	329
Customer Information Systems	247	Intra-organizational communication	9
Customer service	247	IS journal orientation	339
		IS literature	339
Data base management systems	283	IS maturity	107
Data model	93	IS Project management	133
Data quality	267	IS personnel	23
Decision confidence	71	IS planning models	133
Decision making	71	IS research	107, 339
Decision quality	71	IS Strategic planning	133
Decision speed	71		
Decision support systems	283	Journal stratification	339
Definition	225		
Design tools	61	Keypad	53
Developing countries	283	Knowledge acquisition from multiple experts	121
Difference	225	Knowledge acquisition techniques	121
Diffusion of MIS research	339	Knowledge-based systems	71, 83
Diffusion of IS research	339		
Distributed database	267		

Learning	71	Research themes	305
Logistic regression	159	Research topics	107
Management information systems	283, 329	Risk management	257
Management of IS personnel	23	Risk management	267
Management of information systems	237	Security constraints	93
Methodological rigor	305	Selecting development techniques	209
MIS journal orientation	339	Social systems	247
MIS literature	339	Software development	33
MIS survey research	305	Software exports	33
Model-based reasoning	209	Software imports	33
Multi level security	93	Software purchase	257
National IT plan	329	Software selection	257
Nationality issues	339	Stage hypothesis	237
Nationwide approach	329	Stage models	133
Neural nets	267	Standards	305
Neural network forecasting	159	Strategic utilization	329
Neural networks	1, 159	Structured methods	41, 61
NORMA	247	Supercomputer	291
Object-oriented	267	Supercomputer applications	291
Offshore computing	33	Supercomputing in U.S. corporations	291
Offshore systems development	33	Survey	225
Opinion	225	Survey method	305
Organizational preparedness models	133	System architecture	93
Packaged software	257	Systems analysis	33
Parallel processing	267	Systems analysis and design	61
Passwords	53	Systems design	33, 247
Pattern recognition	267	Systems development	33
People's Republic of China	283	Systems development methods	61
Performance evaluations	171	Telecommunications technology	33
Personal identification numbers	53	Training	147
Point of sale	53	Universities	171
Priority setting	319	University administration	283
Problem solving	71	Unstructured decision making	1
Programming languages	61	User documentation	147
Reference analysis	339	Users	225
Reliability	203	Using IT effectively	133
Research methods	107	Variation	225
Research quality	305	Voice mail	9
