1. "Power sharing is a good way to ensure the stability of political order." Elaborate .
 - Imposing the will of the majority community over others may often lead to social conflicts.
 - Social conflicts may lead to violence and political instability.
 - Thus power sharing between different social groups reduces the possibility of social conflicts thereby ensuring political stability.

2. How does the "Reserved Constituencies" of India serve as an example of power sharing ?
 - The reserved constituencies are an example for power sharing with different social groups.
 - Constituencies are reserved in the Parliament and Assemblies to give space in the government and administration to different social groups , particularly the minorities.
 - This method is used to give the minority communities a fair share in power.
