The SCORM module enables you (the teacher) to upload any SCORM or AICC package to include in your course.

SCORM 1.2 is supported in Moodle but SCORM 2004 is not - see supported versions in the SCORM FAQ for more information.

SCORM (Sharable Content Object Reference Model) is a collection of specifications that enable interoperability, accessibility and reusability of web-based learning content. SCORM content can be delivered to learners via any SCORM-compliant Learning Management System (LMS) using the same version of SCORM.

- Creating SCORM Content

- SCORM FAQ

Using Moodle forum discussions:

- Don't use SCORM!
- Simple introduction to SCORM
- Are there any suggestions for scorm authoring with Microsoft word / or any other easy (maybe free) scorm authoring tool?
- Is SCORM worth it?
