## Introduction

**The Library** aims to provide comprehensive resources and services in support of the research, teaching, and learning needs of the medical community across the state.

With most of the information consumed online, LIBRARY shall also makes strategic investments towards licensing or subscribing to eResources. However, procuring eResources is just half the job. Just like you have a physical library to house and deliver print collections, the department realizes the need for a digital library to deliver a cohesive eReading experience.

- **Users must not to go through multiple disparate publisher platform to consume eResources wasting time and effort. LIBRARY shall empower students with a Google like search interface for publications, case files and articles.**
- **From a student looking for a 'quick to learn' video lecture to a scholar looking for research article, or other information like freelance projects, events, etc; LIBRARY shall serve diverse information and content that the community needs.**
- **Full Text access of most of the subscribed collections is restricted by publishers to the campus IP range or via login based authentication. LIBRARY cannot expect users to remember multiple login credentials and at the same time cannot limit usage to only campus. The eLibrary must have a seamless, secure, remote authentication tool.**
- **Most of the students don't own a laptop but the ownership of smart phones and penetration of mobile network is very high in the Institute. LIBRARY must extend access of eResources to students' smart phones.**

**Refread** is India's fastest growing digital library platform that within its three year of launch has become the platform of choice for over 400 Libraries. One of the objectives of Refread is to help Indian libraries make high impact, strategically beneficial investments in technology.

Refread also aggregates world class content from eBooks, eJournals, Videos, Presentations and NEWS; all on one cloud platform. Once an elegant digital library is built for your campus, users shall get 24x7 full text access to all the library resources, wherever they are, on any device.

### Some of Our Clients

## Refread eLibrary Collection: Single Platform to serve all Content Needs

- **Single discovery interface** to integrate and provide search across:
  - All current and future subscribed journals and eBooks ; from all publishers
  - Existing Library WEB-OPAC and D-Space Repositories
- A massive library of full-text open access e-Resources related to Health and Medical Science including:
  1. More than **3600 full text eJournals** from quality OA publishing sources
  2. Over 8,000 **full text ebook titles and published reports**
  3. **A searchable database of over 2,000 full text Thesis, Dissertation and course documents**
  4. **Over 10,000 Audio-Visual learning resources, videos of surgical operations** curated and subject categorized from platforms like UGC-CEC and many popular Youtube Tele-medicine channels.
  5. An article index of over 6 Million research articles
  6. 5 Custom curated collections including all the Research related to Covid19 (38000+ research papers)
  7. Literature, classics, poetry in Hindi Punjabi, Urdu and English for leisure reading

## Other Features of eLibrary (Refread)

### Quick, Integrated, Precise Search

Refread enables a quick & precise discovery to cut the information overload and deliver “Noise Free Full-text access”

Users get pin point accuracy with flexibility to BROWSE or SEARCH by keyword within any bibliographic facet like Author, Publication, Subject, Source, Media type and more

### Remote Access - 24x7, Anywhere

Refread provides users with a 24x7, global access of full-text content. The simplicity, power and security of this solution would enable the department to extend secure remote access to their patrons. Some salient features:

1. Fully controlled by the Central administrator for configuring rights at user/resource level
2. Integrated with article search engine
3. Single Sign-On facility
4. Fully secure, cloud based

Users just need to search/Browse > Click on Read and they will get Full Text Access from everywhere, anytime and on any device.

### User Personalization features

1. Save and organize search results in web folders
2. Save search queries for alerts
3. Share favourite eResources with peers in email or social walls
4. Export Citations
5. Item requests and recommendations
6. **SocioLib** – India’s First Socio-Library. An engaging place to follow peers and see what they are finding relevant in the eLibrary.

## Refread Cloud Repository Builder (A custom feature to support knowledge sharing activities)

Refread has a fully integrated institutional repository framework for central administrator and selected users to upload documents to the Refread cloud. These documents will be automatically indexed for full text search from the eLibrary platform.

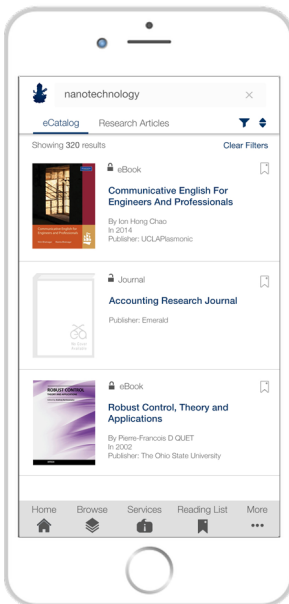

1. Will allow uploading of NON-CONFIDENTIAL texts, presentations and data sets
2. Will help the organization showcase internal publications and gain citations
3. A separate cloud space of 100 GB for the Admin to upload texts, videos or datasets.
4. Allowing administrator to add 'Metadata Only' items. Users can then place a request for full text to the central administrator (on-demand fulfilment) on the platform itself.

## Admin Features

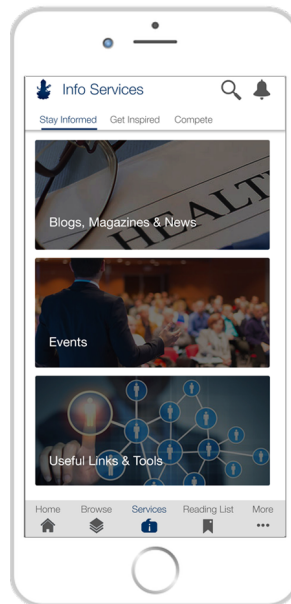

1. Graphical reports to monitor usage by user, period, resource, location and many other pivot points
2. Register users and manage remote access rights by the publisher, set daily download limits or account expiry date
3. Send email and in-app notifications for free
4. Create staff picks to promote new content, manage Noticeboard to release important notifications, and updates on the eLibrary home-page

## Customized eLibrary Mobile App

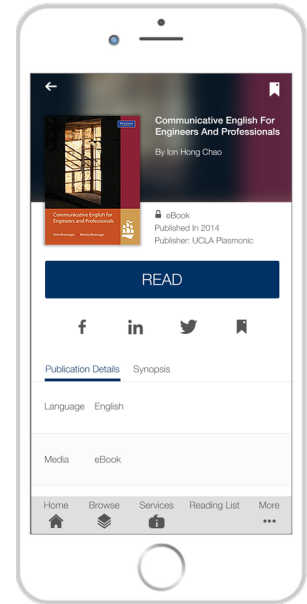

**Your eLIBRARY** will have an Android and iOS mobile app to provide access on the go. Users can save content for future reference or share it with other registered users.

**Search Results with Full Bibliography**

**Smart, Intuitive UI**

**Full Text Access from Anywhere, anytime**
