GUIDES

Massive List of MOOC Platforms Around The World in 2022

This list contains all MOOC platforms worldwide (not limited to English). Hundreds of thousands of free online courses are provided on these MOOC platforms.

Dhawal Shah, Laurie Pickard & Rui Ma
Jan 11th, 2022

23

Back in October 2011, Stanford professors launched three free online courses, open to the public. One by one, these courses went massive, with enrollments topping 100,000 students each. Soon

MEXICO and ITALY.

After a decade of popularization, a total of 220 million students have signed up for at least one course on one of the MOOCs platforms, and 40 million did so in 2021 alone (excluding China). MOOCs and MOOC platforms are still in growing, even after the crazy “Year of the MOOC” prompted by the pandemic and travel restrictions in 2020.

At Class Central, we try to catalog as many MOOCs as possible, and our listing currently includes more than 59,000 of them, from MOOC platforms and other online learning platforms. But due to limited resources (and sometimes a language barrier), we cannot index every single one. If you’re looking for MOOCs from around the world (many in languages other than English), this list is our best attempt to catalog all different MOOC platforms that are out there.

The list has been adapted with permission from *Mindshift: Break Through Obstacles to Learning and Discover Your Hidden Potential* by Barbara Oakley (Tarcher-Perigee, April 2017). We first published this list in 2017. It was last updated and expanded in 2022.

Table of Contents

MOOC Platforms from North America & United States

- Coursera / United States
- edX / United States
- Udacity / United States
- Canvas Network/ United States
- Kadenze / United States
- Stanford Lagunita / United States
- Complexity Explorer / United States
- MéxicoX / Mexico

MOOC Platforms from Europe & United Kingdom

- FutureLearn / United Kingdom
- France Université Numérique (FUN) / France
- Miríadax / Spain

◦ MOOC.fi / Finland

◦ Prometheus / Ukraine

◦ Open Education (openedu.ru) / Russia

MOOC Platforms from Asia (excluding Chinese MOOC Platforms)

◦ SWAYAM / India

◦ NPTEL / India

◦ JMOOC / Japan

◦ gacco / Japan

◦ Fisdom / Japan

MOOC Platforms from North America & United States

Coursera / United States

Your Course to Success

Build skills with courses, certificates, and degrees online from world-class universities and companies.

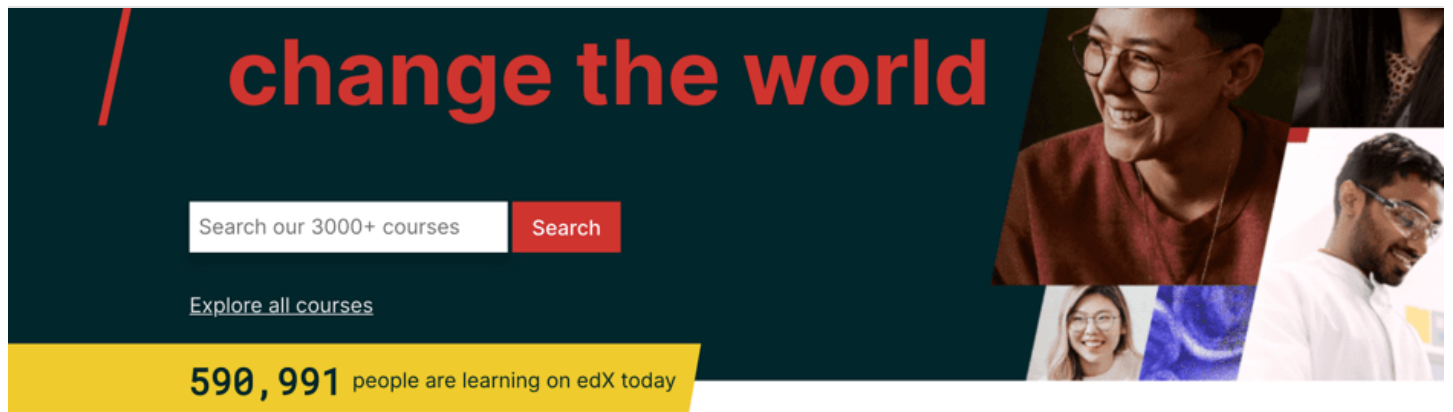

[Join for Free](#)

Two Stanford professors, Andrew Ng and Daphne Koller, officially launched Coursera in January 2012. In March 2021, Coursera finished its 9-year monetization journey with an IPO (NYSE: COUR) on NYSE. With over 97 million students and \$519 million raised in funding, Coursera is the biggest MOOC platform in the world. By the end of 2021, Coursera offers approximately 8250 online courses from over 250 partners. Beyond single courses, Coursera offers its own credential, known as a Specialization. Coursera's catalog currently lists more than 550 Specializations. The MOOC platform also hosts 34 fully-online master's degrees in fields such as computer science, data science, business, and public health. Coursera for Business makes online courses available to business clients.

edX / United States

change the world

Search our 3000+ courses

[Explore all courses](#)

590,991 people are learning on edX today

MIT Massachusetts Institute of Technology HARVARD UNIVERSITY Berkeley UNIVERSITY OF CALIFORNIA THE UNIVERSITY of TEXAS SYSTEM BOSTON UNIVERSITY UNIVERSITY SYSTEM of MARYLAND →

Founded by Harvard University and MIT in 2012, edX is a non-profit organization. But In 2021, edX was acquired by 2U for \$800M, and stopped being a nonprofit. EdX is the second largest MOOC platform in the world, with more than 42 million students and 7 million new learners. EdX offers approximately 3550 courses and boasts 139 university partners. EdX offers a number of different types of certificate programs, including 57 MicroMasters (which offer a pathway to credit), 52 XSeries, 265 Professional Certificate, and 98 Professional Education. In 2021, edX launched 4 new credentials called MicroBachelors, started offering higher-priced Executive Education courses, and launched a new product line for universities called edX Online Campus. Like Coursera, edX has launched multiple online degree programs.

Udacity / United States

within reach.

Discover the fastest, most effective way to gain job-ready expertise for the careers of the future.

FOR INDIVIDUALS

Transform your career.

FOR ENTERPRISE

Transform your business.

FOR GOVERNMENT

Transform your workforce.

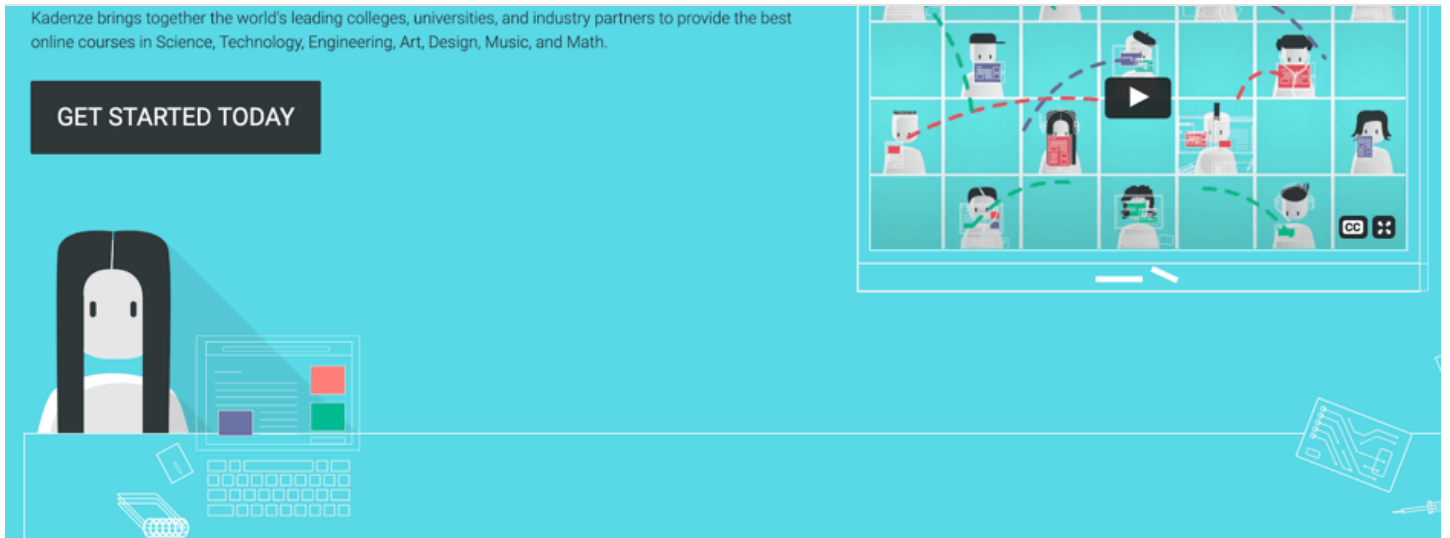

Udacity has pivoted away from its prior identity as a MOOC platform. It was the first of the original MOOC platforms to reach unicorn status (> \$1 billion valuation), and it partners with technology companies to create Nanodegrees that train students for technology-focused jobs. Nanodegrees cost around \$1,000, and they can take a few months to complete. Although Udacity has stopped releasing free courses, it still has some courses in its catalog that are free to audit.

In 2021, Udacity consolidated its enterprise focus, launched fewer free courses but more tripled scholarships. As of fall 2020, Georgia Tech's online master's in computer science (OMSCS) isn't offered through Udacity anymore. Udacity partnered with Georgia Tech to create and launch the first MOOC-based degree, a low cost, completely online Masters in Computer Science degree. To date, the program has enrolled more than 10,799 students. Recently, Udacity has undergone multiple changes, as the company strives to improve its performance.

Kadenze / United States

Kadenze is a MOOC platform that specializes in creative and arts education. It partners with some of the best art institutions and universities around the world to launch online courses. It was co-founded by Ajay Kapur, a classically trained Indian musician and computer scientist. He is Associate Dean for Research and Development in Digital Arts at the California Institute of the Arts (CalArts). In October 2013, he taught a course called “Introduction to Programming for Musicians and Digital Artists” on Coursera. However, he soon realized that some of the things he wanted to do with arts education were not possible with Coursera, so he created his own MOOC platform.

Kadenze has also launched its own certificate initiative, which is called Kadenze Programs. Typically, the first course in a Program is free. Students can also earn academic credit for many Kadenze courses and Programs.

Canvas Network / United States

Because the Best Educators Never Stop Learning

Lifelong learning and professional development for educators go hand-in-hand with Canvas Network's open, online courses, taught by experts and institutions worldwide.

Categories 

Canvas Network might not have the big names, but the MOOC platform does have a number of free online courses taught by various institutions around the world. Some of their courses still offer completely free certificates and badges. They shifted their focus to professional development (PD) courses for educators, removing some courses that were not in this specific field and currently listing 600 courses. Some courses have paid options that can be used for official credit for licensure renewal (LR) or university credits.

Canvas Network is based on the Canvas LMS, which was developed by Instructure.

- [Canvas Network homepage](#)
- [Canvas Network courses on Class Central](#)
- [Canvas Network to Focus on Professional Development for Educators](#)

Stanford Lagunita / United States

Stanford had self-hosting courses for a long time. The MOOC platform used Open edX, the open source version of edX. In 2020, Stanford moved its courses to edx.org and announced the shut down of Stanford Lagunita.

- [Stanford Lagunita homepage](#)

Complexity Explorer / United States

The MOOC platform Complexity Explorer provides online courses and educational materials about complexity science. Complexity Explorer is based out of the Sante Fe Institute. Two of their courses, Introduction to Complexity and Introduction to Dynamical Systems and Chaos, are on Class Central's list of the Top 50 MOOCs of All Time.

- [Complexity Explorer homepage](#)
- [Complexity Explorer courses on Class Central](#)

MéxicoX / Mexico

MéxicoX is a MOOC platform funded by the Mexican government, and it has more than 40 partners (universities and institutions from the Federal Public Administration). It has more than 2.5 million registered learners, a majority of whom are located in Mexico.

MOOC Platforms from Europe & United Kingdom

FutureLearn / United Kingdom

FutureLearn is a UK-based MOOC platform. The Open University launched FutureLearn at the end of 2012. After a recent investment round, FutureLearn is now jointly owned by the Open University and the Australia based SEEK Group. With almost 17 million users, FutureLearn is the UK's biggest MOOC platform. Most of its university partners are located in the UK and Europe, but it also has a few university partners in other countries, including the United States, Australia, and South Korea.

FutureLearn offers its own credential program, which is known as FutureLearn Programs. In 2021, FutureLearn launched a new type of microcredential, ExpertTrack. Among MOOC platforms, FutureLearn leads the way with its degree offerings, with 24 degree programs currently available (including one bachelor's degree).

Prometheus / Ukraine

Like many other MOOC platforms, Prometheus is a non-profit organization. It was launched in October 2014, and it partners with Ukrainian universities and companies to launch free online courses. It has around 250 courses and more than 1.8 million registered users.

- [Prometheus Ukraine homepage](#)

Open Education (openedu.ru) / Russia

This MOOC platform was created by the Association “National Platform of Open Education,” founded by leading universities: MSU, SPbPU, St. Petersburg State University, NUST, MISA, NRU “Higher School of Economics”, MIPT, UFU, and ITMO. It currently lists more than 780 courses.

- [Open Education \(openedu.ru\) homepage](#)

MOOC Platforms from Asia (excluding Chinese Language MOOC Platforms)

SWAYAM / India

SWAYAM is India's national MOOC platform. It offers over 2253 courses taught by close to 1,300 instructors from over 203 Indian universities. One aspect that sets it apart from other platforms is that it allows students in India to earn academic credit online. Since the platform was launched in 2017, the number of student enrollment has reached 21 million on SWAYAM. At the rate it's growing, in a few years, SWAYAM could become the world's largest MOOC platform.

JMOOC / Japan

JMOOC is not really a MOOC platform, but it is a non-profit association aimed at promoting MOOC education in Japan. It has its own certification standards process which assesses the quality of MOOCs in Japan. The courses that pass this examination process are qualified as JMOOC-certified courses. The three Japanese MOOC platforms listed above all have courses that have been JMOOC certified. JMOOC currently offers 536 courses.

Fisdom / Japan

Fisdom is another Japanese MOOC platform. It was launched in February last year by Fujitsu, a Japanese multinational company. Fisdom's tagline is "Freedom is Wisdom. Knowledge is Freedom."

- [Fisdom homepage](#)

OpenLearning / Japan

OpenLearning Japan, as the name suggests, is a MOOC platform. It was launched by Net Learning Inc., an education service company based in Japan.

- [OpenLearning Japan homepage](#)

K-MOOC / Korea

K-MOOC, or Korean MOOC, is the official MOOC platform of Korea. The MOOC platform was initiated by the Ministry of Education and first went live in 2015. Currently, it lists over 900 courses

ThaiMOOC / Thailand

ThaiMOOC is one of the newest MOOC platforms in this list. It was launched in March 2017. It is the official MOOC platform for Thailand. The ThaiMOOC platform is built on Open edX and currently lists more than 500 courses.

IndonesiaX / Indonesia

IndonesiaX is a non-profit MOOC platform that offers MOOCs made by universities and companies in Indonesia. It was launched in August 2015 and currently offers almost 40 free online courses.

- [IndonesiaX homepage](#)
- [IndonesiaX intro video](#)

Edraak (Arabic) / Jordan

Edraak means “realization” in Arabic, and this is a non-profit Arabic MOOC platform. It was launched in May 2014 and is affiliated with the Queen Rania Foundation for Education and Development (QRF). Edraak has more than two million learners registered on the MOOC platform.

Campus-Il / Israel

Campus-Il is the national MOOC platform of Israel. The MOOC platform offers courses in Hebrew and Arabic. It is run by the Israeli Ministry of Social Equality. Courses are directed at an Israeli audience that includes university students and professors, high school students preparing for university, job seekers, and government workers. The MOOC platform also includes courses designed to serve underprivileged communities, on topics such as digital literacy and financial literacy.

- [Campus-il's homepage](#)

Chinese Language MOOC Platforms

XuetangX / China

XuetangX is China's first and biggest MOOC platform. It was founded in 2013 by Tsinghua University under the supervision of China's Ministry of Education Research. It's probably the fastest growing MOOC platform. When Class Central interviewed XuetangX's Chairman of the Board back in October 2016, the MOOC platform had five million users. By the end of its 8th birthday on October 10 2021, XuetangX had crossed 80 million registered users.

The MOOC platform was originally built upon a heavily customized version of Open edX but moved away from it, redesigned the platform and went international in the beginning of 2020. Over 5000 free courses, boot camps and certification programs are offered on the MOOC platform.

XuetangX also has a cloud learning management system (LMS) product that is used by universities across China, and which has been used by more than 48 million Chinese students by the end of 2020.

Chinese University MOOC / China

Chinese University MOOC, also often called iCourse, is another massive Chinese MOOC platform. According to its “about” page, it is an online education platform launched by Netease and Higher Education Society. The MOOC platform went international with free courses in English in April 2020. This MOOC platform hosts over 10,000 free courses with free digital certificates from over 700 Chinese universities. Many courses have been reused as also credit SPOC for over a thousand of universities during the pandemic.

Is Udemey an mooc ?

[Reply](#)

Muvaffak Gozaydin

8/6/2019 at 2:39am

no no what so ever ?It is for hobbiests .

[Reply](#)

Pritish

9/14/2019 at 12:51am

I found Udemey courses to be better than Coursera. Coursera is only for people who want to get a degree. Udemey offers applied and practical courses which cover theory, coding and practical exercises. Udemey is way better than purely academic courses offered by Coursera.

[Reply](#)

Lucio

1/20/2022 at 11:48am

Disagree.

Coursera course are far more complete.

To advance in your path, you should have both, theory and practice, not one, not the other standing alone. BOTH.

Coursera have guided projects as well. So, don't see your point

KIRILL

5/7/2019 at 8:42am

Hi!

Thank you for a fantastic list.

Maybe the following two platforms will become a good asset Russian stepik.org and Austrian imooc.at. Both are mainly contributed by academics and offer free courses.

Beverley Oliver

8/7/2019 at 9:03pm

Fantastic report, as usual, Dhawal Shah – thank you. I have just published a related paper which you may find interesting ...

“Making micro-credentials work for learners, employers and providers” attempts to make observations as to what, in the near term, will make micro-credentials work, or work better (definitions, standards, and quality signals, for example) but in the longer term bigger picture thinking is required: they need to become related to and more interoperable with formal education systems through strategies related to credit for prior learning, lifelong learning accounts, and similar.

Report can be accessed at tiny.cc/agc

Best wishes,
Beverley Oliver

[Reply](#)

That's a great compilation. A big thank you! It's especially cool if the courses are published under a free license, so we might translate and adapt them to our own languages.

You wrote that you would like to list as many MOOCs as possible, so I also want to add some platforms from the German-speaking community:

<https://oncampus.de> or <https://mooin.oncampus.de> (same platform, but filtered for MOOCs) is the platform of the University of Applied Sciences in Lübeck, Germany. There is also a "sister" from Austria: iMooX: <https://imoox.at>. And the German federal state of Bavaria has recently launched the <https://open.vhb.org/> platform.

Best regards

Anja
